This book spells out a home school teacher's writing plan from Grades 3 through 12. It includes fifteen steps to produce outstanding writers. The pacing guide allows teachers to begin at any grade and complete the process by the time their students take the college writing exams in high school. Some lesson plans are included and others are recommended. If this book is used with the CreateBetterWriters.com curriculum, the teacher will have a powerful, step-by-step program for writing instruction that can be used for all students simultaneously. Ten years of powerful curriculum for all your students for about \$100. Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade 2 provides an overview of all of the Grade 2 modules, including Sums and Differences to 20; Addition and Subtraction of Length Units; Place Value, Counting, and Comparison of Numbers to 1,000; Addition and Subtraction Within 200 with Word Problems to 100; Addition and Subtraction Within 1,000 with Word Problems to 100; Foundations of Multiplication and Division; Problem Solving with Length, Money, and Data; and Time, Shapes, and Fractions as Equal Parts of Shapes. In *Writers Are Readers*, the mutually supportive roles of reading and writing are made visible through the idea of "flipsides;" how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended texts for maximizing the flipped concept across the year. "Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page," they write. Discover fresh new ways to turn reading strategies into writing opportunities that your students will be excited about and deeply understand. Texas specific. Single title not for individual sale. Sold as part of larger package only. If you are one of those extraordinary teachers who is responsible for the instruction of all academic subjects in your classroom, then this practical pacing guide is for you. Now, in one 6 x 9" notebook, you will find a weekly spread to write down daily instructional timelines on the following subjects: Reading (ELA), Math, Science, Social Studies and Other. There is also plenty of space for Notes. This is the perfect guide to stay on track to ensure curricular continuity across schools in the district. Texas specific. Single title not for individual sale. Sold as part of larger package only. A unique blend of age-appropriate tracing and writing activities are combined with puzzles to make learning fun while helping kindergarteners build alphabet and handwriting skills and develop lifelong learning confidence. Identifying letters and learning to write letters and words are important steps toward reading readiness, and Highlights (TM) infuses Fun with a Purpose® into these essential learning activities. With vibrant art and engaging prompts, Writing exposes kindergarteners to letters and words through tracing and writing practice and the fun of puzzles and other activities, including Hidden Pictures® puzzles and mazes. Pacing Guide created specifically for Texas STAAR. Not sold separately. Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content. Research suggests "general education classrooms" promote progress for students with severe disabilities (Wehmeyer, 2006, pp. 323). However, most students with significant challenges, which is the more appropriate term used to refer to students with severe cognitive impairments and multiple impairments, continue to be educated in substantially separate classrooms, which further limits their access to the general curriculum among many other features of an education provided in the least restrictive environment. The information sought from this study was to determine if the implementation of Pitt County's pacing guides paired with professional development would increase the grade appropriate core curriculum content taught to students with significant challenges in Pitt County. The lack of current research on approaches to improving teachers' capacity to ensure that students with significant challenges are taught general curriculum content drove the interest and potential findings of this study. A new Low-Incidence Instructional Coach process was implemented with all low-incidence teachers. As part of this process, lesson plans were collected before and after the implementation of pacing guides and professional development. The purpose of the lesson plan analysis was to study what core curriculum content was being taught in these classrooms. The pacing guides are a tool that suggests a sequence that teachers could use to teach core curriculum content in their classrooms throughout the school year. The study examined baseline lesson plans collected at the beginning of the Low-Incidence Instructional Coach process and the lesson plans collected after the pacing guides had been implemented. There was hope that the tool, training, and continuous coaching (Low-Incidence Instructional Coach process) would help the teachers enhance the education of students with significant challenges. The professional development for online teaching and learning that you've been asking for An unprecedented pandemic may take the teacher out of the classroom, but it doesn't take the classroom out of the teacher! Now that you're making the shift to online teaching, it's time to answer your biggest questions about remote, digitally based instruction: How do I build and nurture relationships with students and their at-home adults from afar? How do I adapt my best teaching to an online setting? How do I keep a focus on students and their needs when they aren't in front of me? Jennifer Serravallo's *Connecting with Students Online* gives you concise, doable answers based on her own experiences and those of the teachers, administrators, and coaches she has communicated with during the pandemic. Focusing on the vital importance of the teacher-student connection, Jen guides you to: effectively prioritize what matters most during remote, online instruction schedule your day and your students' to maximize teaching and learning (and avoid burnout) streamline curricular units and roll them out digitally record highly engaging short lessons that students will enjoy and learn from confer, working with small groups, and drive learning through independent practice partner with the adults in a student's home to support your work with their child. Featuring simplified, commonsense suggestions, 55 step-by-step teaching strategies, and video examples of Jen conferring and working with small groups, *Connecting with Students Online* helps new teachers, teachers new to technology, or anyone who wants to better understand the essence of effective online instruction. Along the way Jen addresses crucial topics including assessment and progress monitoring, student engagement and accountability, using anchor charts and visuals, getting books into students' hands, teaching subject-area content, and avoiding teacher burnout. During this pandemic crisis turn to one of education's most trusted teaching voices to help you restart or maintain students' progress. Jennifer Serravallo's *Connecting with Students Online* is of-the-moment, grounded in important research, informed by experience, and designed to get you teaching well-and confidently-as quickly as possible. Jen will be donating a portion of the proceeds from *Connecting with Students Online* to organizations that help children directly impacted by COVID-19. Attempts to design an educational experience that aims towards a tomorrow that is better than today. This book showcases strategies which support teachers and principals as they implement high standards for students. At the same time, it demonstrates how to meet the needs of diverse learners. A young girl hopes to find her mother as she rides an Orphan Train to find a new life out west in "this finely crafted, heart-wrenching story" (Publishers Weekly, starred review). Marianne, heading west with fourteen other children on an Orphan Train, is sure her mother will show up at one of the stations along the way. When her mother left Marianne at the orphanage, hadn't she promised she'd come for her after making a new life in the West? Stop after stop goes by, and there's no sign of her mother in the crowds that come to look over the children. No one shows any interest in adopting shy, plain Marianne, either. But that's all right: She has to be free for her mother to claim her. Then the train pulls into its final stop, a town called Somewhere . . . An American Library Association, Notable Children's Book ALA Booklist Editor's Choice Jefferson Cup Award Honor Book *Cris* describes the systems and structure she uses in her own classroom and shows teachers how to use assessments to monitor student growth and provide targeted feedback that enables students to master content goals. She also shares ways to bring students into the assessment cycle so they can monitor their own learning, maximizing motivation and engagement. --from publisher description. Texas specific. Single title not for individual sale. Sold as part of larger package only. Pacing Guide created specifically for Texas STAAR. Not sold separately.
