International GAAP® 2019 is a comprehensive guide to interpreting and implementing International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and providing insights

into how complex practical issues should be resolved in the real world of global financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching IFRS. Written by EYs financial reporting professionals from around the world, this three-volume guide to reporting under IFRS provides a global perspective on the application of IFRS. Complex technical accounting issues are explained clearly and IFRS is set in a practical context with numerous worked examples and hundreds of illustrations from the published financial reports of

major listed companies from around the world. The 2019 edition of International GAAP® has been fully revised and updated in order to:

- Continue to investigate the many implementation issues arising as entities adopt IFRS 9 (Financial Instruments) and IFRS 15 (Revenue from Contracts with Customers).
- Explore the complex implementation issues arising as entities adopt, in 2019, IFRS 16 (Leases).
- Include an updated chapter on the new insurance contracts standard IFRS 17 (Insurance Contracts), which reflects the recent discussions of the

IASB's Transition Resource Group on implementation issues raised, proposed narrow-scope amendments to IFRS 17 intended by the IASB, and also explores other matters arising as users prepare for the adoption of this standard.

- Include an amended chapter on the revised Conceptual Framework, which was published in March 2018. The changes to the Conceptual Framework may affect the application of IFRS in situations where no standard applies to a particular transaction or event.
- Address amended standards and new interpretations issued since the preparation of the

2018 edition.

- Explain the many other initiatives that are currently being discussed by the IASB and by the IFRS Interpretations Committee and the potential consequential changes to accounting requirements.
- Provide insight on the many issues relating to the practical application of IFRS, based on the extensive experience of the book's authors in dealing with current issues.

Ukraine's economic progress since its independence in the early 1990s has been uneven, in part due to the slow pace of reforms, unfavorable demographic factors, and low productivity. One of the key factors limiting success is the inadequacy of the skills of Ukraine's workforce with the

needs of a modern economy. While the country demonstrates a strong record of educational attainment and acquisition of foundational skills, the post-secondary education and training system fails to equip workers with the right advanced skills for labor market success. This study provides new evidence on the nature of skills valued in the labor market, reviews the institutional constraints hindering the development and use of workforce's skills, and proposes a set of policy options. This study argues that, to improve skills formation and use, Ukraine needs to

renew its public policies on post-secondary education, labor-market intermediation and information, and labor regulations. Drawing on household and firm surveys, the study finds that workers need a mix of advanced cognitive skills (like problem solving and communication), socio-emotional skills (like self-management and teamwork), and technical skills (like computer programming or sale skills) to be successful in the labor market and meet employers' demand. These skills are not necessarily explicitly taught in traditional learning settings. Policy

makers should therefore rethink the content of post-secondary education and training to focus on the development of skills for the labor market rather than only attendance. To do so, establishing steady links between education institutions and enterprises, by setting up occupation standards and adapting curricula to firm demand, is crucial. An essential instrument to identify the demand for skills and facilitate fruitful investments in skills formation is a labor market information system—which provides reliable information on labor market prospects across

post-secondary education fields and institutions and job requirements and characteristics to students, their families, and jobseekers. Nonetheless, a better formation of skills would only be beneficial if most of the workforce can put them at use in jobs, promoted by better labor regulations. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP 2016 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial

reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP 2016 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of

approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed

requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP 2016 deals with a key area of IFRS and has a common structure for ease of use:

- An introduction to the background issues
- An explanation of relevant principles
- A clear exposition of the requirements of IFRS
- A discussion of the implications in practice and possible alternative solutions available
- Worked examples
- Extracts from real company accounts
- A full listing of the required disclosures
