This volume is the first attempt to collect the best smiles from English, as well as from all other literatures. This book provides a concise introduction to and overview of the growing discipline and practice of Appreciative Inquiry (AI). If you are intrigued by the prospect of mobilizing rapid, positive change with multiple stakeholders in a human system that is important to you, this book is for you. Encounter with The Aberdeen Wildman is the examination and explanation of paranormal experiences by the Author. The Author uses his extensive knowledge and instincts of Scripture and other historical and scientific information to examine and explain the paranormal, the crypto-zoological, the spiritual, all the while exposing the various deceptions behind them. Drawing on his experiences not only while piloting aircraft for more than thirty years but also on his own and his wife's brushes with death, Frank Donohue asks, "Who are we? Why were we created? What is our purpose in this life?" Rejecting the human instinct to hate others who are not like us, Frank encourages the reader first to not hate, then to like, and then to work to love others. After discussing the origin of Planet Earth, he shows how religions teach their followers to not hate, with the greatest model of not hating, but loving and forgiving instead, being Jesus. The conclusion of his "Trinity for Me" prayer sums up his life's goal: "Please help me to love God, myself, and everyone. I love you, trust you, believe in you, and hope to be with you. Amen." When Charles Darwin first stepped off the HMS Beagle and into the harsh and formidable world of the Galápagos islands with their sun-baked lava, spiny cactus, and tangled brushwood, he encountered many birds and animals new to him. He marveled at the remarkable tameness of the birds and the striking dominance of reptiles in these islands, which made the archipelago seem like a journey back in time. On the shoreline were swarms of "hideous-looking" marine iguanas -- the world's only oceangoing lizards. On land, Darwin and the Beagle crew encountered large land iguanas, closely allied to their marine cousin; several smaller lizards and snakes; and giant land tortoises, after which the islands are named. How, Darwin asked himself, had life first come to these islands? Most of the life forms, he noted, were aboriginal creations, found nowhere else. Of all the creatures he encountered, none were as surprising and important to his studies as the Galápagos bears. In Darwin and His Bears, scientist and Darwin scholar Frank J. Sulloway reveals a crucial -- yet little known -- link that led to Darwin's development of the theory of evolution: sixteen brilliant bears residing on the sixteen archipelago islands. Charles Darwin had an undeniable knack for asking the right questions, and these remarkable blueberry-loving bears had all the answers he needed. With their invaluable assistance, Darwin was able to reassess his imperfect evidence, ultimately culminating in what we now celebrate as the Darwinian revolution. Delightful and deeply informative, Darwin and His Bears recounts the fabled adventure of Darwin's groundbreaking visit to "a shore fit for Pandemonium," as Beagle Captain Robert FitzRoy described the Galápagos on their arrival in 1835. As Sulloway recounts this fascinating story, he also reveals the critical conceptual steps by which Darwin reached his theory of evolution by natural selection -- and provides, according to philosopher Philip Kitcher, "a brilliant summary and explanation of large swaths of evolutionary theory." Ninety charming colorful drawings by the author introduce us to all sixteen whip-smart, magnanimous bears and help bring to life the true story of Darwin's scientific triumph. Readers of Darwin and His Bears should greatly enjoy what paleontologist and MacArthur "genius award" recipient Jack Horner has dubbed "the funnest science book I've ever read." If you or someone you love is suffering from any of the following, you can now find out why--and what you can do about it . * Anxiety * Loss of pleasure * Irrational fears * Obsessional thoughts * Erratic mood swings * Procrastination * Compulsive overeating * Extreme shyness * Depression * Self-destructive behavior * Phobias * Excessive anger * Perfectionism * Drug abuse Psychological Symptoms Now, in this indispensable reference, Dr. Frank J. Bruno helps you understand the origins of and treatment available for several common psychological symptoms, which can impinge on your daily life and even signal deeper emotional trouble. A comprehensive sourcebook, Psychological Symptoms provides a detailed description of 27 symptom groups, each complete with an analysis of possible biological and psychological causes, as well as concrete everyday examples of characteristic self-defeating, self-destructive thinking and acting. Containing over 150 specific, self-directed strategies for dealing with an array of troubling, debilitating behaviors, as well as a guide to the various forms of psychological and psychiatric therapies available, Psychological Symptoms lets you finally gain perspective and control over problems that can impair your emotional health and well-being. Taking a clear-eyed look at American higher education over the last twenty years, Donohue outlines a web of forces--social, political, and institutional--dismantling the professoriate. Today, fewer than 30 percent of college and university teachers are tenured or on tenure tracks, and signs point to a future where professors will disappear. --from publisher description This book explores the development, content, and impact of world culture. Combining several of the most fruitful theoretical perspectives on world culture, including the world polity approach and globalization theory, the book gives a historical treatment of the development of world culture and assesses the complex impact of world culture on people, organizations, and societies. This is a provocative, synthetic, and grounded interpretation of world culture that is essential for any student or scholar of globalization and world affairs. Traces world culture back from the mid-19th century to the present day Includes numerous illustrations of key issues and empirical research Written in lively, accessible language for the student and general scholar Our God is a God who is in total control of all that happens to the whole world and to each of us individually. God can allow or prevent bad things from happening. Of course, most of us desire that God would prevent bad things from happening. When we are seated next to the toilet on an airplane, we pretty much assume that God could care less whether we are seated next to the toilet or are seated in first class. Yet God controls every single action that occurs in the world, or He would not be God. When we are seated next to the toilet of life, we discover, as Job did, that God allowed this to happen for all things to work together for good for those who love Him and are called according to His purpose. God's plan for us, who trust in Him, are to prosper us and not to harm us but to give us hope and a future. The purpose of this book is to show that no matter how bad the evil and sin that confront us, God is in total control, and His words of promise to us will be fulfilled. On this earth, you may lose all that you have: family; friends; wealth; health; possessions; dignity, and told to curse God and die, as Job was. Through God's grace and mercy, you can endure as Job endured. Do not think that Job endured only because God knew him as a "blessed man who lives righteously." You and I are most certainly not of the character of Job, but God has seated us next to the same toilet of life where Job was seated. Because God is always nearby during our trials (He told Job that), we will discover God's specific plan for us when He does seat us next to the toilet, whether it be on the plane or on the earth. "Frank J. Cannon: Saint, Senator, Scoundrel is the first biography to refresh the record on Frank J. Cannon's critical role in early Utah history"-- GLOBALIZATION "Lechner has drawn on his extensive work on, and his deep knowledge of, globalization to write a brief, accessible, and highly successful introduction to the field. The early chapters on food, sport, and mass media should pique the student's interest and lure them into a deeper involvement with later chapters and the field in general." George Ritzer, University of Maryland "Frank Lechner's text takes on key issues in the study of globalization with real clarity and critical power. An authoritative account of the major issues, theories, and debates in the field, aptly illustrated by diverse contemporary examples, this text offers a clear analysis of a complex topic that will be an invaluable resource for students and scholars." Fran Tonkiss, London School of Economics Written in a lively and accessible style, Globalization: The Making of World Society shows how globalization affects everyday experience, creates new institutions, and presents new challenges. With many examples, Lechner describes how the process unfolds in a wide range of fields, from sports and media to law and religion. While sketching the outlines of a world society in the making, the book also demonstrates that globalization is inherently diverse and contentious. In this concise analysis of a complex subject, Lechner presents some of the best work in the social sciences in clear and readable fashion. Globalization: The Making of World Society will serve as a stimulating, state-of-the-art text for any student of globalization, beginner or advanced. Operation MH/CHAOS was the code name for a domestic espionage project conducted by the Central Intelligence Agency in the late 1960s and early 1970s. MH/CHAOS: The CIA's Campaign Against the Radical New Left and the Black Panthers is an insider's account of the CIA's Counterintelligence Staff's Special Operations Group first charged by Presidents Lyndon Johnson and later by Richard Nixon to find foreign intelligence, terrorist, organizations or government contacts, controlling or influencing Anti-Vietnam War activists or American black extremists protesting, bombing and carrying out other anti-government, unlawful or illegal activities in the United States. The operation was launched under Director of Central Intelligence Richard Helms, by chief of counter-intelligence, James Jesus Angleton, and headed by Richard Ober. The program's goal was to unmask possible foreign influences on the student antiwar movement. The "MH" designation signified that the program had a worldwide area of operations. When President Nixon came to office in 1969, all of the existing domestic surveillance activities were consolidated into Operation MH/CHAOS and used CIA stations abroad to report on antiwar activities of United States citizens traveling abroad, employing methods such as physical surveillance and electronic eavesdropping, utilizing "liaison services" in maintaining such surveillance. The operations were later expanded to include 60 officers. In 1969, following the expansion, the operation began developing its own network of informants for the purposes of infiltrating various foreign antiwar groups located in foreign countries that might have ties to domestic groups. Eventually, CIA officers expanded the program to include other leftist or counter-cultural groups with no discernible connection to Vietnam, such as groups operating within the women's liberation movement, including Students for a Democratic Society, the Black Panther Party and Women Strike for Peace. Also targeted was the Israeli embassy, and domestic Jewish groups such as the B'nai B'rith. As a result of the Watergate break-in, involving two former CIA officers, Operation MH/CHAOS was discontinued. The secret nature of the program was exposed by Seymour Hersh in the New York Times on December 22, 1974. The following year, further details were revealed during Representative Bella Abzug's House Subcommittee on Government Information and Individual Rights. The government, in response to the revelations, launched the Commission on CIA Activities Within the United States (The Rockefeller Commission), lead by then Vice President Nelson Rockefeller, to investigate the depth of the surveillance. In Operation MHCHOAS, the author, who is a former CIA officer, refutes the charges made by the New York Times and the Washington Post at the time that this domestic spying program first made headlines, and takes issue with conclusions of the Rockefeller Commission and the Church Committee. He relates how the Special Operations Group began, was staffed and how it was transformed into an anti-terrorist unit before it ceased operation. Rafalko details the information that Special Operations Group collected against the New Left and Black extremists and makes the case that the MHCHOAS program was justified, why the CIA was the logical agency to conduct the collection, and the consequences suffered later by American counterintelligence because of these investigations. An intellectual biography aiming to demonstrate, despite his denials, that Freud was a "biologist of the mind". The author analyzes the political aspects of the complex myth of Freud as "psychoanalytic hero" as it served to consolidate the analytic movement. A highly respected physicist demonstrates that the essential beliefs of Christianity are wholly consistent with the laws of physics. Frank Tipler takes an exciting new approach to the age-old dispute about the relationship between science and religion in The Physics of Christianity. In reviewing centuries of writings and discussions, Tipler realized that in all the debate about science versus religion, there was no serious scientific research into central Christian claims and beliefs. So Tipler embarked on just such a scientific inquiry. The Physics of Christianity presents the fascinating results of his pioneering study. Tipler begins by outlining the basic concepts of physics for the lay reader and brings to light the underlying connections between physics and theology. In a compelling example, he illustrates how the God depicted by Jews and Christians, the Uncaused First Cause, is completely consistent with the Cosmological Singularity, an entity whose existence is required by physical law. His discussion of the scientific possibility of miracles provides an impressive, credible scientific foundation for many of Christianity's most astonishing claims, including the Virgin Birth, the Resurrection, and the Incarnation. He even includes specific outlines for practical experiments that can help prove the validity of the "miracles" at the heart of Christianity. Tipler's thoroughly rational approach and fully accessible style sets The Physics of Christianity apart from other books dealing with conflicts between science and religion. It will appeal not only to Christian readers, but also to anyone interested in an issue that triggers heated and divisive intellectual and cultural debates. * A complete course, from brain biology to abnormal psychology * Hundreds of questions and many review tests * Key concepts and terms defined and explained Master key concepts. Ancient guide through the process from death to rebirth, a spiritual journey that can take up to 49 days, shorter if the guide is followed carefully and well. From the moment in 1770 when Reverend Eleazar Wheelock located Dartmouth College in Hanover, the "College on the Hill" and the "Village at the College" have been inseparably linked as one. And from the time when the first log hut was constructed to the present, the built and natural environments have evolved as part of an organic evolutionary process. Due to changing architectural tastes, neglect and growth, many of the historic buildings that once flourished are no longer standing. Bygone landmarks like the beautiful entry porte-cochere at the Mary Hitchcock Memorial Hospital and the handful of handsome buildings that marked the start of the University of New Hampshire are now lost to history. Join architect and historian Jay Barrett as he uncovers the stories behind the forgotten treasures of Hanover. Within the pages of Dr. Kinslow's new book you will learn to go beyond the instant healing power of Quantum Entrainment to, with a single procedure, realize your deepest spiritual and material goals. You will learn how to find your Eufeeeling, the hub around which all the creative forces of nature revolve, then how to use it to form a powerful and immediately effective intention. Making the most abstract subjects easy to understand and practical to use, Dr. Kinslow shows the reader how to tap their natural harmonizing zones deep within their minds. He is the discoverer and developer of Quantum Entrainment, the ground-breaking healing technique that thousands around the globe have successfully used to eliminate emotional and physical discord in themselves and others. Now, in Eufeeeling! Dr. Kinslow brings to bear that same easy style of coaching that was so successful in teaching you Quantum Entrainment. In Eufeeeling! Dr. Kinslow introduces the reader to the QE Intention, a unique and practical tool that anyone can use to improve emotional and physical disharmony, unsettled relationships and financial difficulties, and even influence environmental stresses. QE Intention shows you how a simple shift in your awareness will organize the creative forces of nature in your favor as easily as iron filings align in the presence of a strong magnet. QE Intention can quickly satisfy even your deepest desires. Once initiated, QE Intention is effortless and extraordinarily effective. It uses the creative energy and harmony of Eufeeeling as a spiritual launching pad to quickly accomplish material goals. If you are already doing intention work you will find that adding QE Intention to your practice will greatly accelerate the results you are already having. And what's more exciting, creating a QE Intention takes no special training or talent. If you are reading these words you have everything you need to create a QE Intention. The hot topic these days is foods that do more than just nourish your body. Antioxidants, prebiotics, probiotics-- all are in the news. Through the ages, certain foods and herbs have been promoted to new mothers to increase their milk supplies. These foods and herbs, called galactagogues, likely increase milk production by increasing prolactin or oxytocin to initiate the breastmilk letdown reflex and aid in breastmilk ejection. Pharmacist Frank Nice and his wife, Myung Hee, have pulled together over 200 recipes featuring major and minor galactagogues in this cookbook. Dr. Nice includes dosage, uses, and cautions about each of the galactagogues. They have included many old family favorites passed down from their Polish and Korean ancestors. Some recipes include unusual ingredients - Stinging Nettle Pesto with Ravioli, Corn Bread with Red Clover Blossoms, Hot Chocolate Mousse with Marshmallow Root Fluff. Others have ingredients that are quite common - Pineapple Raisin Oat Bran Muffin, Sautéed Brussels Sprouts with Garlic and Olive Oil, Avocado Shrimp Salad, Chicken Tacos. All have been taste-tested and confirmed to be delicious! If you are a new mom struggling with milk supply or if you just want to insure that your milk supply stays strong, try some of these recipes. Even if you aren't breastfeeding, the recipes in this cookbook are worth trying! The use of nonprescription or over-the-counter (OTC) medications by breastfeeding mothers is even more common than the use of prescription drugs. The sale and use of these products is a multi-billion dollar industry. Because they are available for common and not-so-common maladies, there is an overwhelming and bewildering variety of nonprescription products available to consumers. Thus, there is always the possibility that a breastfed infant could receive these medications through breast milk, just as with prescription drugs. Ocean City, which calls itself "America's Greatest Family Resort," is today best known for its wide, clean beaches and a yearly bayfront celebration called the "Night in Venice." Founded in 1879 as a Christian seaside resort, the island community still maintains some of its early traditions including prohibiting the sale of alcoholic beverages--while striving to continue its long-standing reputation as a family-oriented resort. This remarkable new photographic history features such historic sites as the home of the town's first resident and famous old-time restaurants like Chris', Hogate's, and Watson's. Several rare pictures of the shipwrecked Sindhia and its cargo are also included, as well as photographs of Ocean City's most well-known citizens, Princess Grace Kelly and author Gay Talese. Medicaid, one of the largest federal programs in the United States, gives grants to states to provide health insurance for over 60 million low-income Americans. As private health insurance benefits have relentlessly eroded, the program has played an increasingly important role. Yet Medicaid's prominence in the health care arena has come as a surprise. Many astute observers of the Medicaid debate have long claimed that the program for the poor is a poor program—prone to erosion because it serves a stigmatized, politically weak clientele. Means-tested programs for the poor are often politically unpopular, and there is pressure from fiscally conservative lawmakers to scale back the \$350-billion-per-year program even as more and more Americans have come to rely on it. For their part, health reformers had long assumed that Medicaid would fade away as the country moved toward universal health insurance. Instead, Medicaid has proved remarkably durable, expanding and becoming a major pillar of America's health insurance system. In Medicaid Politics, political scientist Frank J. Thompson examines the program's profound evolution during the presidential administrations of Bill Clinton, George W. Bush, and Barack Obama and its pivotal role in the epic health reform law of 2010. This clear and accessible book details the specific forces embedded in American federalism that contributed so much to Medicaid's growth and durability during this period. It also looks to the future outlining the political dynamics that could yield major program retrenchment. Pure, Frank Reilly method of painting by Reilly's student/class monitor Ralph Garafola. The Canvas Awaits - Fill It! Frank J. Reilly - The Elements of Painting" presents the principles and concepts of the craftsmanship involved in the graphic arts. The guidelines presented here will help students, art teachers and professional painters and designers discover and/or further develop their craft. The book is a must read for both the aspiring painter and accomplished artist - and everyone in between. It also assists art teachers and art schools in the instruction of their students and serves well as a college text book of art. Frank J. Reilly was an American painter, illustrator, muralist and teacher. Reilly served as the Commissioner of Art for New York City. Ralph Garafola studied at the Art Students League of New York for seven years with Reilly. Reilly was married with no children and considered his students family. He became both mentor and father-figure for Garafola. "To succeed in the realm of graphic arts, like dancing and music, one must acquire knowledge. By practicing and applying that knowledge, one becomes skillful. It was Reilly's logical application which was the basis for developing my craft. After 65 successful years I have never found reason to change the drawing or painting methodology Reilly taught to me. Now through this book I share it with you." Ralph Garafola, author How do we reconcile the death sentence - specifically, a sentence of death that was pronounced on the 8th of May in 1987 - with our marriage, and more importantly, with eternal life? In order to answer this question, we need not only to look back, but especially, to look forward. Before we were joined in marriage, we were two people from two extremely divergent backgrounds. Frank, the only child born to affluent parents, had a childhood of privilege; Rachel, the only daughter of a couple who later divorced, had a childhood riddled with difficulties. In spite of the difficulties, Rachel became "one of us" - a hard-working American with a kind and gentle heart and a rock-solid belief in God. Despite the privileges and the affluence, Frank's "choices" - some that he made and some that had been foisted upon him - led him down the dark trail that ended, eventually, on Death Row in an Arizona prison. The stories of our lives are the stories of the two very different people, who, several years after the death sentence had been pronounced, were married on December 17, 1991. They are the stories of how Rachel became "one of us" and of how Frank's "choices" led him so far astray. They are the stories of how we met and married; but they go further, for they are the stories that explain how each of us discovered Orthodoxy and came to be Eastern Orthodox Christians, and especially, of how the trajectory of our lives has so completely changed. Merely being Orthodox Christians can never be enough; we have learned to lead lives of prayer, repentance, and most of all, hope. With our hope firmly grounded in our risen Lord and Savior, Jesus Christ, we look forward to life in Him, because only in Him are all things possible. We must emphasize that we did not "become one" upon our marriage, but years later. Through our individual life experiences and through our shared experiences, we have learned, at last, what is meant by "And The Two Shall Become One". At the request of clergy near and dear to us, we offer these, first, our individual and then, our shared experiences to the scrutiny and prayers of all who read them. And we pray, always for the salvation of all. Haphazard dabbling in stocks by amateur traders undoubtedly is dangerous. The odds are all in favor of losing money. The risks can be greatly reduced if the trader only would make some attempt to learn the rules of the game. Driving an automobile is dangerous, and few people attempt it without first learning something of the mechanism of the car. But any death-dealing machine can be made safe through knowledge of its working parts and possibilities. -from the Foreword There are common-sense rules for even the most daring investment speculation, even in a precarious economic environment... as in the wake of the dramatic stock market crash of 1929. This guide to smart speculating offers sound advice on determining whether you're really cut out for speculation, what warning signs in your financial situation should steer you toward safer investing, the best way to use margin trading, how to find reliable information on stocks, why you should shun all tips, why you should be a "bad loser," and much more. Not just a historical guide to one of the most unstable periods in American economic history, this is a useful primer for today's investor, too. After several years as a small-town lawyer in Alpena, Frank J. Kelley was unexpectedly appointed Michigan's attorney general at the end of 1961. He never suspected that he would continue to serve until 1999, a national record. During that time, he worked with everyone from John and Bobby Kennedy to Bill Clinton and jump-started the careers of dozens of politicians and public figures, including U.S. Senator Carl Levin and Governors James Blanchard and Jennifer Granholm. In The People's Lawyer: The Life and Times of Frank J. Kelley, the Nation's Longest-Serving Attorney General, Kelley and co-author Jack Lessenberry reflect on the personal and professional journey of the so-called godfather of the Michigan Democratic Party during his incredible life and thirty-seven years in office. The People's Lawyer chronicles Kelley's early life as the son of second-generation Irish immigrants, whose father, Frank E. Kelley, started out as a Detroit saloon keeper and became a respected Democratic Party leader. Kelley tells of becoming the first of his family to go to college and law school, his early days as a lawyer in northern Michigan, and how he transformed the office of attorney general as an active crusader for the people. Among other accomplishments, Kelley describes establishing the first Office of Consumer Protection in the country, taking on Michigan's public utility companies, helping to end racially restrictive real estate practices, and helping to initiate the multibillion-dollar Tobacco Master Settlement Agreement in 1998. Kelley frames his work against a backdrop of the social and political upheaval of his times, including the 1967 Detroit riots, the disappearance of Jimmy Hoffa, and the assassinations of John F. Kennedy, Robert F. Kennedy, and Martin Luther King, Jr. All those interested in American history and legal history will enjoy this highly readable, entertaining account of Kelley's life of public service. Is there a higher power in the universe? What happens to us when we die? Leading physicist Frank J. Tipler tackles these questions and more in an astonishing and profoundly important book that scientifically proves the existence of God and the physical resurrection of the dead. For years people have been waiting for a book that merges the abstract Eastern philosophy of inner peace with the scientific applications of quantum physics. Well, that book has finally arrived! The Secret of Quantum Living is a straightforward guide that offers profound spiritual insights and a practical, easy-to-apply process for healing and harmonious living. Join Dr. Frank Kinslow on a journey to deep inner peace through what quantum physics calls the "implicate order." Within the pages of this powerful book, you will learn Dr. Kinslow's process of Quantum Entrainment® (QE) and discover how to enrich and enliven all areas of your life. You'll be able to resolve problems or challenges you face by applying QE to your finances, your relationships, your sex life . . . and even your eating, sleeping, and exercising habits. You will also uncover ways to dissolve anger issues, negative thinking, physical pain, and emotional discord. And the great news is that anyone can practice QE! It doesn't require previous training, and it's so simple that a child can do it. The Secret of Quantum Living is fun to read and exciting to apply. You'll begin seeing results from your very first session. Give it a try . . . you'll be surprised how quickly the process works for you! Originally published in London in 1857 and never before available in paperback, The Garies and Their Friends is the second novel published by an African American and the first to chronicle the experience of free blacks in the pre-Civil War northeast. The novel anticipates themes that were to become important in later African American fiction, including miscegenation and 'passing,' and tells the story of the Garies and their friends, the Ellises, a 'highly respectable and industrious coloured family.' Praise for Selling Sucks "Whew! A terrific new book that blows the lid off the old-school methods of selling—which don't work anymore—and shows you how to make sales almost like magic! I love this book!" —Joe Vitale, author of The Attractor Factor and many other books "I love to buy, so I'm going to give every salesperson I know a copy of this book. Maybe they'll finally stop the old-school, hard-sell shtick that compels me (and everyone else) not to buy." —Michael Port, bestselling author of Book Yourself Solid "Selling sucks, but making sales doesn't. Read Frank's book to learn the crucial difference that will almost certainly mean success or failure for your business in the new era of commerce." —Mark Joyner, bestselling author of Simpleology www.simpleology.com "Ready to join the ranks of the top sales pros? Buy Selling Sucks. Apply its lessons. Then watch your results go through the roof." —Randy Pennington, author of Results Rule! "Rumbauskas has the ability to overcome the obvious and allow his readers to look at sales in a new dimension. While many people focus on sales tricks, Rumbauskas shows, in great detail, how to get your prospects to buy because they come to you informed and trustful of you before you even say 'hello.' He's one of those guys I listen to every time he speaks. He speaks out of tested methods and not opinion. Prior to marketing online, I spent fourteen years running some of the largest automobile dealerships in the USA. This is one book I would make recommended reading for every person who wants to become an elite sales professional. Selling Sucks is a money-making winner." —Mike Filsaime, MikeFLive.com "Selling Sucks is a must-read for any entrepreneur who wants to run a high-profit, high-integrity business. Rumbauskas's advice is inspiring, clear, and more importantly, easy to implement. It's honestly one of the best how-to self-marketing books on the market. Get this book now if you're serious about exploding your sales and making more money." —Marie Forleo, author and Fox News Online Life Coach www.thegoodlife-inc.com "Rumbauskas has written an indispensable guide to moving from an average salesperson to a top sales pro. This is a must-read for anyone serious about their sales career." —Paul McCord, author of Creating a Million-Dollar-a-Year Sales Income Take a journey with the unlikeliest of characters as they band together to search for a missing teenager. Learn how a Native American, a New Jersey mafia capo, and an FBI agent come together and try to find the missing teenager, who also has ties to the mafia capo and FBI agent. The ensuing search will take you to the most questionable of places and characters that lead this story to a dramatic and brutal ending! What Duke Ellington and Miles Davis teach us about leadership How do you cope when faced with complexity and constant change at work? Here's what the world's best leaders and teams do: they improvise. They invent novel responses and take calculated risks without a scripted plan or a safety net that guarantees specific outcomes. They negotiate with each other as they proceed, and they don't dwell on mistakes or stifle each other's ideas. In short, they say "yes to the mess" that is today's hurried, harried, yet enormously innovative and fertile world of work. This is exactly what great jazz musicians do. In this revelatory book, accomplished jazz pianist and management scholar Frank Barrett shows how this improvisational "jazz mind-set" and the skills that go along with it are essential for effective leadership today. With fascinating stories of the insights and innovations of jazz greats such as Miles Davis and Sonny Rollins, as well as probing accounts of the wisdom gleaned from his own experience as a jazz musician, Barrett introduces a new model for leading and collaborating in organizations. He describes how, like skilled jazz players, leaders need to master the art of unlearning, perform and experiment simultaneously, and take turns soloing and supporting each other. And with examples that range from manufacturing to the military to high-tech, he illustrates how organizations must take an inventive approach to crisis management, economic volatility, and all the rapidly evolving realities of our globally connected world. Leaders today need to be expert improvisers. Yes to the Mess vividly shows how the principles of jazz thinking and jazz performance can help anyone who leads teams or works with them to develop these critical skills, wherever they sit in the organization. Engaging and insightful, Yes to the Mess is a seminar on collaboration and complexity, against the soulful backdrop of jazz.
