A Cooperative Disagreement demonstrates how Canada and the United States successfully kept divergent policies on revolutionary Cuba from damaging their bilateral relationship. Covering the period from 1959 to the end of the Cold War, John Dirks investigates the efforts of Canadian and US diplomats and bureaucrats to cooperate despite their respective approaches toward Cuba. This book draws on archival documents from both countries to reveal how these two North American powers continued to adhere to the hard policy boundaries set by their own governments while establishing a mutually beneficial relationship on issues of intelligence, travel, and other areas of engagement with Cuba. The convergence of tough-on-crime politics, stiffer sentencing laws, and jurisdictional expansion in the 1970s and 1980s increased the powers of federal prosecutors in unprecedented ways. In *Hard Bargains*, social psychologist Mona Lynch investigates the increased power of these prosecutors in our age of mass incarceration. Lynch documents how prosecutors use punitive federal drug laws to coerce guilty pleas and obtain long prison sentences for defendants—particularly those who are African American—and exposes deep injustices in the federal courts. As a result of the War on Drugs, the number of drug cases prosecuted each year in federal courts has increased fivefold since 1980. Lynch goes behind the scenes in three federal court districts and finds that federal prosecutors have considerable discretion in adjudicating these cases. Federal drug laws are wielded differently in each district, but with such force to overwhelm defendants' ability to assert their rights. For drug defendants with prior convictions, the stakes are even higher since prosecutors can file charges that incur lengthy prison sentences—including life in prison without parole. Through extensive field research, Lynch finds that prosecutors frequently use the threat of extremely severe sentences to compel defendants to plead guilty rather than go to trial and risk much harsher punishment. Lynch also shows that the highly discretionary ways in which federal prosecutors work with law enforcement have led to significant racial disparities in federal courts. For instance, most federal charges for crack cocaine offenses are brought against African Americans even though whites are more likely to use crack. In addition, Latinos are increasingly entering the federal system as a result of aggressive immigration crackdowns that also target illicit drugs. *Hard Bargains* provides an incisive and revealing look at how legal reforms over the last five decades have shifted excessive authority to federal prosecutors, resulting in the erosion of defendants' rights and extreme sentences for those convicted. Lynch proposes a broad overhaul of the federal criminal justice system to restore the balance of power and retreat from the punitive indulgences of the War on Drugs. Including a new section on evaluation accountability, this Third Edition details 30 standards which give advice to those interested in planning, implementing and using program evaluations. Although

Robert Morris (1734-1806), "the Financier of the American Revolution," was a signer of the Declaration of Independence, the Articles of Confederation, and the Constitution, a powerful committee chairman in the Continental Congress, an important figure in Pennsylvania politics, and perhaps the most prominent businessman of his day, he is today least known of the great national leaders of the Revolutionary era. This oversight is being rectified by this definitive publication project that transcribes and carefully annotates the Office of Finance diary, correspondence, and other official papers written by Morris during his administration as superintendent of finance from 1781 to 1784. The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. This multi-volume set of reissued classics brings together a collection of titles that touch on many key aspects of the history of the Middle East. From the early explorers of Arabia to the 1979 revolution in Iran, via histories of places as varied as the UAE and Zanzibar, the analysis of Nazi policies towards the Arab East, and a close reading of the territorial foundations of the Gulf states, the books collected here form a wide-ranging and eclectic study of the history of the region. Postwar American officials desired, in principle, to promote Arab-Israeli peace in order to stabilize the Middle East. This book shows how, during the Truman and Eisenhower administrations, the desire for peace was not always an American priority. Instead, they consistently gave more weight to their determination to contain the Soviet Union. This book explores the persistence of the governance gap with respect to the human rights-impacting conduct of transnational extractive corporations operating in zones of weak governance. The authors launch their account with a fascinating case study of Talisman Energy's experience in Sudan, informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan (Harker Mission). Drawing on new governance, reflexive law and responsive law theories, the authors assess legal and other non-binding governance mechanisms that have emerged since that time, including the UN Guiding Principles on Business and Human Rights. They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations, or of assuring accountability of these actors or recompense for victims of such violations. The authors contend that home state regulation, while not a silver bullet, has a crucial role to play in regulating

such conduct. They pick up where UN Special Representative John Ruggie's Guiding Principles on Business and Human Rights left off, and propose an innovative, robust and adaptable template for strengthening the regulatory framework of home states. Their model draws insights from the theoretical literature, leverages existing public, private, transnational, national, 'soft' and hard regulatory tools, and harnesses the specific strengths of state-based governance. This book will be of interest to academics, policy makers, students, civil society and business leaders. The events described in this book span most of the period, from the end of the Second World War until close to the end of the century, when New Zealand began to think for itself, and stand on its own feet as an independent nation. It follows an important thread in the development of New Zealand foreign policy, in the contexts of intergovernmental negotiation and, as it must in a democracy such as ours, the expression of the popular will. The story begins with post-War investigations of possible peaceful uses of nuclear technology in New Zealand, and proceeds through many of the issues that have galvanised society - US and British nuclear tests in the Pacific, confrontations with France, the South Pacific Nuclear Free Zone, nuclear-powered ship - visits and ANZUS, the Nuclear Free legislation. Book jacket. This book addresses some of the most difficult and important debates over injury and law now taking place in societies around the world. The essays tackle the inescapable experience of injury and its implications for social inequality in different cultural settings. Topics include the tension between physical and reputational injuries, the construction of human injuries versus injuries to non-human life, virtual injuries, the normalization and infliction of injuries on vulnerable victims, the question of reparations for slavery, and the paradoxical degradation of victims through legal actions meant to compensate them for their disabilities. Authors include social theorists, social scientists and legal scholars, and the subject matter extends to the Middle East and Asia, as well as North America. This research and policy book examines the role of women in the military and the overwhelming evidence to date that warranted repealing the combat exclusion policy. It explores the following questions: How can the success of women in the military serve as justification for its repeal? What will be the potential impact of repealing the policy on the recruitment, promotion and retention of women in the military? How will repealing the combat exclusion policy change the ways in which military men relate to military women? How can repealing the policy set women on the course toward full agency and representation as full citizens in American society at large? Not only will this book help in filling the gaps of the existing literature of public administration and public policy about women in the military but it will provide the personal insights of women who have served under the combat exclusion policy. Presents detailed information on individual programs and appropriation accounts that constitute the budget. Includes for each Government department and agency the text of proposed appropriations

language, budget schedules for each account, new legislative proposals, and explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or groups of agencies. This paper discusses Uganda's Fifth Review Under the Policy Support Instrument (PSI) and Request for Waiver of an Assessment Criterion and Modification of Assessment Criteria. The economy of Uganda has fared well in a difficult environment. Program performance under the PSI was generally positive. All end-June and continuous quantitative assessment criteria were observed, with one exception, and so were most indicative targets. Inflation remained within the bands of the consultation clause. An unprecedented increase in tax revenue was a key achievement. However, further progress on structural reforms is needed. The authorities are rightly adjusting the policy mix. The IMF staff recommends completing the fifth review under the PSI. This publication provides unique and indispensable guidance to all in the insurance industry, other businesses and their counsel in identifying and understanding the risks (notably including cyber risks) they face by using social media in the business world and mitigating those risks through a compilation of best practices by industry experts and rulings by courts and regulatory authorities. It features analyses of pertinent policies, statutes and cases. In this updated fourth edition, author Maurice Levi successfully integrates both the micro and macro aspects of international finance. He successfully explores managerial issues and focuses on problems arising from financial trading relations between nations, whilst covering key topics such as: * organization of foreign exchange markets * determination of exchange rates * the fundamental principles of international finance * foreign exchange risk and exposure * fixed and flexible exchange rates. This impressive new edition builds and improves upon the popular style and structure of the original. With new data, improved pedagogy, and coverage of all of the main developments in international finance over the last few years, this book will prove essential reading for students of economics and business.
