Excerpt from Standard Classification of Construction and Operating Accounts for Electric Light and Power Companies: As Adopted by the National Electric Light Association, in the Years 1908 and 1909 The Accounting Committee has not attempted in the following pages to generally explain the fundamental principles of bookkeeping, but it recognizes the desire on the part of a few to become familiar with matters pertaining to correct accounting. There are others who regard accounting as something more or less mysterious, therefore, a thing

which must be handled with care, or avoided entirely. The question before us is strictly a money saving device, and the keeping of accounts (books) is merely incidental. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such

as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a

historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Excerpt from Uniform Classification of Accounts for Electric Utilities From time to time circulars have been issued explaining the general principles upon which the accounts to be kept were to be based, and what subdivisions were to be made, with the result that a considerable number of utilities have for some time had in operation a system which conforms substantially to that here with submitted. It will be noticed by those utilities that the principal difference between this

classification and that which they are now using, is in the title of certain accounts rather than in the subdivisions. The work in its present form is the result of an examination of accounting systems of practically all electric properties in this state supplemented by numerous conferences with electric company officials and their committee on accounting. It is desired that those electric utilities which have not already conformed their accounts to this system will do so at their earliest convenience. It is possible that after an adequate trial, some alterations will be found expedient both from the standpoint of general experience and practice or be cause of local and individual conditions. For the present, however, this classification is adhered to and prescribed and upon it will be based the annual report to be made to the Railroad Commission. In the near future a detailed text of instructions to accompany this classification will be mailed to each utility. Owing to the great difference in sizes of the properties it was found necessary to

prepare two separate schedules which would recognize these conditions, and by each following the same general principles would permit comparison of operating results between the smallest and largest plants. Class B schedule is the basis upon which Class A schedule has been founded, the latter being an unfolding and refinement of the former.
