This provides an illustration that, in order to create new or modified knowledge management practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge management knowledge structures in a way that is appropriate for delivering value to the customer. Organizations must simultaneously develop effective strategies for updating the knowledge of their members necessary for underpinning the creation and delivery of appropriate knowledge management services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links their particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and performance? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science, and as cognitive science. Emphasis will be put on systematic learning from experience, developing tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible to frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made in addressing the challenges faced by continuous learning in knowledge-intensive organizations. A Tribe Called Quest • Beastie Boys • De La Soul • Eric B. & Rakim • Fugees • KRS-One • Pete Rock & CL Smooth • Public Enemy • The Roots • Run-DMC • Wu-Tang Clan • and twenty-five more hip-hop immortals

It's a sad fact: hip-hop liners have always been reduced to a list of producer and sample credits, a public photo or two, and some hastily composed shout-outs. That's a damn shame, because outside the game know about the true creative forces behind influential masterpieces like PE's *It Takes a Nation of Millions*, De La's *3 Feet High and Rising*, and Wu-Tang's *Enter the Wu-Tang (36 Chambers)*. A longtime scribe for the hip-hop nation, Brian Coleman fills this void, and delivers a thrilling, knockout oral history of the albums that define this dynamic and iconoclastic art form. The format: One chapter, one artist, one album, blow-by-blow and track-by-track, delivered straight from the original sources. Performers, producers, DJs, and b-boys—including Big Daddy Kane, Muggs and B-Real, Biz Markie, RZA, Ice-T, and Wyclef—step to the mic to talk about the influences, environment, equipment, samples, beats, beefs, and surprises that went into making a classic record. Studio craft and street smarts, sonic inspiration and skate ramps, tragedy, and take-out food—all played their part in creating these essential albums of the hip-hop canon. Insightful, raucous, and addictive, *Check the Technique* transports you back to hip-hop's golden age with the greatest artists of the '80s and '90s. This is a book that belongs on the stacks next to your wax. "Brian Coleman's writing is as good as the albums he covers: direct, uproarious, and more than six-fifths genius." —Jeff Labrecque, author of *Can't Stop Won't Stop* "All producers and hip-hop fans must read this book. It really shows how these albums were made and touches the music fiend in every one of us." —Evil Dee of Black Moon and Da Beatminerz "A rarity in mainstream publishing: a truly essential rap history." —Ronin Ro, author of *Have Gun Will Travel*
