Life of Napoleon Bonaparte Feb 02 2021

**Private Guns, Public Health** Dec 20 2019 "In this small book David Hemenway has produced a masterwork. He has dissected the various aspects of the gun violence epidemic in the United States into its component parts and considered them separately. He has produced a scientifically based analysis of the data and indeed the microdata of the over 30,000 deaths and 75,000 injuries which occur each year. Consideration and adoption of the policy lessons he recommends would strengthen the Constitutional protections that all of our citizens have to life, liberty, and the pursuit of happiness." -Richard F. Corlin, Past President, American Medical Association "This lucid and penetrating study is essential reading for anyone who wishes to understand the tragedy of gun violence in America and-even more important-what we can do to stop it. David Hemenway cuts through the cant and rhetoric in a way that no fair-minded person can dismiss, and no sane society can afford to ignore." -Richard North Patterson, novelist "The rate of gun-related homicide, suicide, and accidental injury has reached epidemic proportions in American society. Diagnosing and treating the gun violence epidemic demands the development of public health solutions in conjunction with legislative and law enforcement strategies." -Kweisi Mfume, President and CEO of NAACP "In scholarly, sober analytic assessments, including rigorous critiques of NRA-popularized pseudoscience, David Hemenway constructs a convincing case that firearm availability is a critical and proximal cause of unparalleled carnage. By formulating such violence as a public health issue, he proposes workable policies analogous to ones that reduced injuries from tobacco, alcohol, and automobiles." -Jerome P. Kassirer, Editor-in-Chief Emeritus, New England Journal of Medicine, and Distinguished Professor, Tufts University School of Medicine "As a former District Attorney and Attorney General, I know the urgency of providing safe homes, schools and neighborhoods for all. This remarkable tour-de-force is a powerful study of one promising solution: a data-rich, eminently readable demonstration of why we should treat gun violence as an American epidemic." -Scott Harshbarger, Former Attorney General of Massachusetts, President and CEO of Common Cause On an average day in the United States, guns are used to kill almost eighty people, and to wound nearly three hundred more. If any other consumer product had this sort of disastrous effect, the public outcry would be deafening; yet when it comes to guns such facts are accepted as a natural consequence of supposedly high American rates of violence. Private Guns, Public Health explodes that myth and many more, revealing the advantages of treating gun violence as a consumer safety and public health problem. David Hemenway fair-mindedly and authoritatively demonstrates how a public-health approach-which emphasizes prevention over punishment, and which has been so successful in reducing the rates of injury and death from infectious disease, car accidents, and tobacco consumption-can be applied to gun violence. Hemenway uncovers the complex connections between guns and self-defense, gun violence and schools, gun prevalence and homicide, and more. Finally, he outlines a policy course that would significantly reduce gun-related injury and death. With its bold new public-health approach to guns, Private Guns, Public Health marks a shift in our understanding of guns that will-finally-point us toward a solution.

**Genomic and Precision Medicine** Dec 12 2021 Genomic and Precision Medicine: Oncology, Third Edition focuses on the applications of genome discovery as research points to personalized cancer therapies. Each chapter is organized to cover the application of genomics and personalized medicine tools and technologies to a) Risk Assessment and Susceptibility, b) Diagnosis and Prognosis, c) Pharmacogenomics and Precision Therapeutics, and d) Emerging and Future Opportunities in the field. Provides a comprehensive volume written and edited by oncology genomic specialists for oncology health providers Includes succinct commentary and key learning points that will assist providers with their local needs for implementation of genomic and personalized medicine into practice Presents an up-to-date overview on major opportunities for genomic and personalized medicine in practice Covers case studies that highlight the practical use of genomics in the management of patients

Securing Peace in Europe, 1945-62 Apr 04 2021 As European security structures are undergoing transformation in the 1990s it is crucial to examine their origins and rationale: NATO secured peace and facilitated economic and political co-operation, while also becoming the vehicle of national rivalry. This book examines why and how NATO came into existence, and what its strengths and weaknesses were during its formative years. It draws conclusions from these experiences relevant to the

reforms of Western security structures in the 1990s.

**Next Generation Leader** Apr 16 2022 A growing number of next generation Christians are eager to learn, grow, and lead in ministry or in the marketplace. Mentoring young leaders, as they face the unique issues of a changing world, has been pastor and Visioneering author Andy Stanley's passion for more than a decade. Here, he shares material from his leadership training sessions, developed to address essential leadership qualities such as character, clarity, courage, and competency. This is the perfect guide for any new leader -- or for the mentor of a future leader! Clear, stylish typeset, with user-friendly links to referenced Scripture.

**PC Mag** Jan 25 2023 PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

**Grandad Mandela** Sep 21 2022 "...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

**Silence within and beyond Pedagogical Settings** Jan 01 2021 This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

**Dear Photograph** Jun 06 2021 We all have moments we wish we could relive. We'd give anything to skid down the toboggan hills of our youth, to breathe in the smell of our children as babies or to spend just one more minute with a loved one we've lost. Dear Photograph provides a way to link these memories from the past to the present. The idea is simple: hold a photograph from the past up in front of the place where it was originally taken; take a second photograph; add a sentence of dedication about what the photograph means to you. The results, however, are astounding, which is why millions have flocked to the site, and thousands have submitted their own Dear Photographs. This stunning visual compilation includes more than 140 never-before-seen Dear Photographs. By turns nostalgic, charming and poignant, Dear Photograph evokes childhood memories, laments difficult losses and, above all, celebrates the universal nature of love.

**Year 9 NAPLAN\*-style Literacy Tests** Mar 15 2022 This book is designed for parents who want to help their children and for teachers who wish to prepare their class for the NAPLAN Literacy Tests. NAPLAN Tests are sat by Year 9 students Australia-wide. These tests are held in May every year.

**Mood Mapping** Jun 18 2022 Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: \* The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods \* The Miller Mood Map: learn to visually map your mood to increase self-awareness \* Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason

**Light Curve Modeling of Eclipsing Binary Stars** May 25 2020 In the two decades since the development of the first eclipsing-binary modeling code, new analytic techniques and the availability of powerful, sometimes dedicated computing facilities have made possible vastly improved determinations of fundamental and even transient stellar parameters. The scale of these developments, of course, raises questions about modeling tools, techniques, and philosophies, such as: Who will maintain and upgrade the codes? Will the codes be open to improvement by outsiders, and if so, how? And, indeed, what should be the goals of a modeling program? Such questions had not been aired for a long time and, for this reason alone, deserved to be discussed in as general a forum as the community provides. This volume contains material presented by Commission 42 (Close Binary Stars) during the International Astronomical Union's XXI General Assembly in Argentina, July 1991, and during IAU Colloquium 151, Cordoba, Argentina, August 1991. The techniques discussed include

simulations of stellar bright and dark spots, streams, partial and complete stellar disks, prominences, and other features characterizing active stars; modeling of polarization parameters; models that use radial velocities as well as line profile simulations to model velocity field variation across stellar disks; the weighted effects of brightness asymmetries; and models for translucent eclipsing agents such as stellar winds.

**Cumulative Book Index** Jan 13 2022 A world list of books in the English language.

**Blabac Photo** Oct 30 2020 "It's rad what I do." -Mike Blabac Blabac Photo: The Art of Skateboarding Photography is a stunning chronicle of a youth movement as seen through the lens of Mike Blabac, a man who is as dedicated to his craft as he is to the skateboarding lifestyle that inspired it. For millions of people around the world, skateboarding is more than a mere hobby or a sport—it's a way of life that has shaped everything from fashion and music, to videogames and art. Blabac Photo proves that point with 300 awe-inspiring images that communicate the stories and exploits of some of the most creative athletes to ever step on a skateboard including Eric Koston, Stevie Williams, Colin McKay, Rob Dyrdek, and Danny Way. As skateboarding evolved over time, from a hobby for kids on the Venice boardwalk into a global culture, skate legends were born, records were broken, titans of industry materialized—and Mike Blabac was there to document the history of the movement as it developed before his eyes.

**Soggy Sneakers, 5th Edition** Nov 30 2020 Soggy Sneakers has been Oregon's primary source of information for whitewater enthusiasts since 1980. Members of Willamette Kayak and Canoe Club—who have run nearly all of Oregon's rivers—share their expertise and detail rapids and landmarks found on each run. There's something for everyone, from Class 1 (flatwater) excursions to Class 5+ (most challenging) rapid-filled adventures. Headquartered in Corvallis, Oregon, Willamette Kayak and Canoe Club is a nonprofit organization dedicated to teaching kayaking and canoeing skills, promoting water safety, preserving and protecting the free-flowing rivers of Oregon, and developing the camaraderie of their sport. Learn more about them at [www.wkcc.org](http://www.wkcc.org).

**Computational Star Formation (IAU S270)** Aug 28 2020 The rapid advance of computer capabilities over the last two decades has opened up a new field of numerical simulations in which detailed physical models can be made to represent the most complex processes. IAU Symposium 270 reviews a wide range of topics relevant to computer modeling in the fields of interstellar gas dynamics, star formation and galactic dynamics. It includes numerical techniques for modeling physical processes such as self-gravitating, radiative magnetohydrodynamics, as well as novel hardware options for acceleration and a view into the future of computation. Observations of interstellar gas and star formation are also reviewed. This book is ideal for graduate students and researchers in the field of numerical astrophysics.

**Sir Anthony Eden and the Suez Crisis** May 17 2022 A reappraisal of Sir Anthony Eden's conduct of foreign relations during the Suez crisis of 1956. This book challenges previous assumptions and demonstrates that Eden was not as bellicose as has been alleged. It traces his conduct of crisis management, from July until his decision to use force on 14 October, focusing on the Prime Minister's personality and influences. It details the confusion and failed attempts at negotiation that eventually culminated in the reluctant gamble.

**I Believe in Miracles** Nov 18 2019 Kathryn Kuhlman believed in miracles, and this belief—so strong and sincere—enabled thousands to take hold of God's power for their lives during her lengthy career as a healing evangelist.

**Active Close Binaries** Oct 10 2021 Since the 1970s symposia or colloquia devoted to recent research on close binaries have been held around the world almost annually. At meetings of the General Assembly of the International Astronomical Union this topic has also been discussed in detail at presentations in various commission meetings and also as invited talks by leading astronomers in the field. In recent years, fundamental changes have taken place in the study of close binaries due to the improvements in observational techniques, extension of observations from X-ray to radio regions of the electromagnetic spectrum, and advances in theoretical studies. For more than a decade, a group of astronomers at Ege University Observatory has been concentrating on active close binaries with particular emphasis on the behaviour of the light curves of chromospherically active systems. Thus, we decided to organize an international meeting in Western Anatolia, where this part of Turkey had been the cradle for great developments in science during antiquity. KUljadasi, located only minutes away from Ephesus, one of the seven wonders of the world, was selected to be the meeting site. Close binary systems constitute a very rich source of information about the physical properties of the component stars. Some systems are eclipsing variables, where periodic recurrences of eclipses are observed as comparatively brief decreases in the total brightness of the binary system. Precise methods of photometric observations make it possible to obtain the light variations of these systems because of eclipses and other phenomena.

**No Thoroughfare** Jan 21 2020 A story of mistaken identities, courage, justice, and a journey that stretches from the depths of the city of London to the Alps and the Mediterranean.

**Lost Stars** Feb 20 2020 This book identifies the 'lost stars' of Bayer, Lacaille, Flamsteed, and other pioneering astronomers of the 17th and 18th centuries, and explains how and why these stars seem to have disappeared from modern star catalogues and atlases. In a style that will appeal to the novice as well as the seasoned astronomer, the author provides an introduction to early modern astronomy. The book reviews the composition and history of the 88 constellations recognised by the

International Astronomical Union. In an account for each constellation the author includes a synopsis, in chart form, that tells the reader at a glance how many lettered or numbered stars there are in the constellation, the magnitude and catalogue numbers for those stars, and who first lettered or numbered each star. The author then describes the stars that have been 'lost' or mislabelled and explains, in detail, their troublesome status.

**The Gun Debate** Oct 18 2019 No topic is more polarizing than guns and gun control. From a gun culture that took root early in American history to the mass shootings that repeatedly bring the public discussion of gun control to a fever pitch, the topic has preoccupied citizens, public officials, and special interest groups for decades. *The Gun Debate: What Everyone Needs to Know*® delves into the issues that Americans debate when they talk about guns. With a balanced and broad-ranging approach, noted economist Philip J. Cook and political scientist Kristin A. Goss thoroughly cover the latest research, data, and developments on gun ownership, gun violence, the firearms industry, and the regulation of firearms. The authors also tackle sensitive issues such as the effectiveness of gun control, the connection between mental illness and violent crime, the question of whether more guns make us safer, and ways that video games and the media might contribute to gun violence. No discussion of guns in the U.S. would be complete without consideration of the history, culture, and politics that drive the passion behind the debate. Cook and Goss deftly explore the origins of the American gun culture and the makeup of both the gun rights and gun control movements. Written in question-and-answer format, the book will help readers make sense of the ideologically driven statistics and slogans that characterize our national conversation on firearms. This book is a must-read for anyone interested in getting a clear view of the issues surrounding guns and gun policy in America. *What Everyone Needs to Know*® is a registered trademark of Oxford University Press.

**Firearms and Violence** Jul 27 2020 For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics. For public authorities to make reasonable decisions on these matters, they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion. In performing these tasks, legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies. Readers of the research literature on firearms may sometimes find themselves unable to distinguish scholarship from advocacy. Given the importance of this issue, there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research. *Firearms and Violence* uses conventional standards of science to examine three major themes - firearms and violence, the quality of research, and the quality of data available. The book assesses the strengths and limitations of current databases, examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved.

**Continuity Guide to the American National Election Studies, 1952-1986** Oct 22 2022

**Burnham's Celestial Handbook, Volume Two** Feb 26 2023 Volume II of a comprehensive three-part guide to celestial objects outside our solar system ranges from Chamaeleon to Orion. Features coordinates, classifications, physical descriptions, hundreds of visual aids. 1977 edition.

**Market-based Management** Dec 24 2022 "This groundbreaking book provides the tools and processes needed to actually apply market-driven strategy to today's business world. Roger Best's work has proven to be a refreshing alternative to the many conceptual and theoretical-centered marketing books because it is built around a performance orientation and the belief that real learning occurs only with the application of knowledge."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

**Under the Gun** Apr 23 2020 In 1978, the Social and Demographic Research Institute of the University of Massachusetts, Amherst, received a grant from the National Institute of Justice to undertake a comprehensive review of the literature on weapons, crime, and violence in the United States. The purpose of the project is best described as a "sifting and winnowing" of the claims and counterclaims from both sides of the Great American Gun War—the perennial struggle in American political life over what to do, if anything, about guns, about violence, and about crime. The review and analysis of the available studies consumed the better part of three years; the results of this work are contained in this volume. The intention of any review is to take stock of the available fund of knowledge in some topical area. *Under the Gun* is no different: our goal has been to glean from the volumes of previous studies those facts that, in our view, seem firmly and certainly established; those hypotheses that seem adequately supported by, or at least approximately consistent with, the best available research evidence; and those areas or topics about which, it seems, we need to know a lot more than we do. One of our major conclusions can be stated in advance: despite the large number of studies that have been done, many critically important questions have not been adequately researched, and some of them have not been examined at all. Much of the available research in the area of weapons and crime has been done by advocates for one or another policy position. As a consequence, the manifest intent of many "studies" is to persuade rather than to inform. We have tried to approach the topic from a purely agnostic point of view, treating as an open question what policies should be enacted with regard to gun, or crime, control. Thus, we have tried to judge each study on its own merits, on the basis of the routine standards normally applied to social-scientific research, and not on the basis of how effectively it argues for a particular policy direction. It would, of course, be presumptuous to claim that we have set aside all our own biases in conducting this study. Whether or not our treatment is fair and objective is clearly something for the reader, and not us, to decide.
