Sometimes you know things you're not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? And so begins Landon's journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and

perhaps save himself. A short story mystery perfect for fans of Robert Dugoni's *Third Watch* and Dean Koontz's *The Neighbor*. Read as a standalone or as the companion book to *A Secondhand Life*. "If you want to understand usable knowledge, read *Data-Driven School Improvement*." —Ellen Condliffe Lagemann, Harvard University "It is reassuring to know that at least some of the data being generated in our data-driven age are being used to make wiser decisions. We can all learn from these illustrative accounts." —David C. Berliner, Mary Lou Fulton College of Education, Arizona State University "Replete with examples from real schools and districts, this volume provides a multi-layered portrait of what it takes to establish a culture of data use. Readers will come away with an appreciation of the systemic changes needed to reap the full potential of data-driven decision making." —Barbara Means, Center for Technology in Learning, SRI

International Ancient Greece and China Compared is a pioneering, methodologically sophisticated set of studies, bringing together scholars who all share the conviction that the sustained critical comparison and contrast between ancient societies can bring to light significant aspects of each that would be missed by focusing on just one of them. The topics tackled include key issues in philosophy and religion, in art and literature, in mathematics and the life sciences (including gender studies), in agriculture, city planning and institutions. The volume also analyses how to go about the task of comparing, including finding viable comparanda and avoiding the trap of interpreting one culture in terms appropriate only to another. The book is set to provide a model for future collaborative and interdisciplinary work exploring what is common between ancient civilisations, what is distinctive of particular ones, and what may help to account for the latter. This textbook explores the relationship between the natural world and psychological well-being. It draws upon a wide context, brings the experience of our existence as part of the wider natural world to the forefront throughout, and relates it to therapy practice in mainstream settings. Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *KASHER IN THE RYE* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an

abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations. This book explores contested notions of "Chineseness" in Southeast Asia and Hong Kong during the Cold War, showing how competing ideas about "Chineseness" were an important ideological factor at play in the region. After providing an overview of the scholarship on "Chineseness" and "diaspora", the book sheds light on specific case studies, through the lens of the "Chinese cultural Cold War", from Hong Kong, Singapore, Malaya, Thailand, Indonesia and Vietnam. It provides detailed examples of competition for control of definitions of "Chineseness" by political or politically oriented forces of diverse kinds, and shows how such competition was played out in bookstores, cinemas, music halls, classrooms, and even sports clubs and places of worship across the region in the 1950s, 1960s and 1970s. The book also demonstrates how the legacies of these Cold War contestations continue to influence debates about Chinese influence – and "Chineseness" – in Southeast Asia and the wider region today. The rich civilizations of ancient China and Greece built sciences of comparable sophistication--each based on different foundations of concept, method, and organization. In this engrossing book, two world-renowned scholars compare the cosmology, science, and medicine of China and Greece between 400 B.C. and A.D. 200, casting new light not only on the two civilizations but also on the evolving character of science. Sir Geoffrey Lloyd and Nathan Sivin investigate the differences between the thinkers in the two civilizations: what motivated them, how they understood the cosmos and the human body, how they were educated, how they made a living, and whom they argued with and why. The authors' new method integrally compares social, political, and intellectual patterns and connections, demonstrating how all affected and were affected by ideas about cosmology and the physical world. They relate conceptual differences in China and Greece to the diverse ways that intellectuals in the two civilizations earned their living, interacted with fellow inquirers, and were involved with structures of authority. By A.D. 200 the distinctive scientific strengths of both China and Greece showed equal potential for theory and practice. Lloyd and Sivin argue that modern science evolved not out of the Greek tradition alone but from the strengths of China, Greece, India, Islam, and other civilizations, which converged first in the Muslim world and then in Renaissance Europe. Computer graphics is a sub-discipline of computer science which focuses on the techniques used for digital synthesis and manipulation of visual content. It is an interdisciplinary field which makes use of the principles of applied mathematics, image processing, computational geometry, computer vision and information visualisation. Interactive computer graphics is a sub-field of computer graphics which studies the methods employed for generating images and animations at interactive frame rates. It has various benefits over passive computer graphics such as higher image quality, lower design cost and more precise results. The basic components of an interactive computer graphics system are a frame buffer, a monitor and a display controller. Most of the topics introduced in this book cover new techniques and the applications of interactive computer graphics. Different approaches, evaluations and methodologies on this discipline have been included herein. Those in search of information to further their knowledge will be greatly assisted by this book.
