Manuale di diritto internazionale del lavoro Jan 30 2023

More Equal than Others? Mar 27 2020 This book analyses the principle of equality from three perspectives: public international law, private international law and EU law. It is the first book in English providing a comprehensive overview of this principle in these areas of law and showing the current trends and issues concerning its application. Its main goal is to understand whether and to what extent the principle of equality has been affirmed in public and private international law, as well as EU law, and what – if any – the common core of this principle is. The analysis carried out in this contributed volume starts from general analyses of the principle of equality in the areas of the law covered by the book and then discusses the principle in more specific areas, such as human rights law, international adjudication (including investment law) and the law of international organizations. The book is intended to become a benchmark for academics dealing with matters of equality in public international law, private international law and EU law. It will be a useful tool for practitioners too, the collected chapters being based on the relevant case law dealing with the principle of equality. Daniele Amoroso is Professor of International Law in the Department of Law of the University of Cagliari, Cagliari, Italy. Loris Marotti is Assistant Professor of International Law in the Department of Law at the Federico II University of Naples, Italy. Pierfrancesco Rossi is Postdoctoral Fellow in International Law in the Department of Law of Luiss University, Rome, Italy. Andrea Spagnolo is Professor of International Law in the Department of Law of the University of Turin, Turin, Italy. Giovanni Zarra is Professor of International Law and International Litigation in the Department of Law at the Federico II University of Naples, Italy.

[Imperativeness in Private International Law](#) Jul 12 2021 This book centres on the ways in which the concept of imperativeness has found expression in private international law (PIL) and discusses “imperative norms”, and “imperativeness” as their intrinsic quality, examining the rules or principles that protect fundamental interests and/or the values of a state so as to require their application at any cost and without exceptions. Discussing imperative norms in PIL means referring to international public policy and overriding mandatory rules: in this book the origins, content, scope and effects of both these forms of imperativeness are analyzed in depth. This is a subject deserving further study, considering that very divergent opinions are still emerging within academia and case law regarding the differences between international public policy and overriding mandatory rules as well as with regard to their way of functioning. By using an approach mainly based on an analysis of the case law of the CJEU and of the courts of the various European countries, the book delves into the origin of imperativeness since Roman law, explains how imperative norms have evolved in the different conceptions of private international law, and clarifies the foundation of the differences between international public policy and overriding mandatory rules and how these concepts are used in EU Regulations on PIL (and in the practice related to these sources of law). Finally, the work discusses the influence of EU and public international law sources on the concept of imperativeness within the legal systems of European countries and whether a minimum content of imperativeness – mainly aimed at ensuring the protection of fundamental human rights in transnational relationships – between these countries has emerged. The book will prove an essential tool for academics with an interest in the analysis of these general concepts and practitioners having to deal with the functioning of imperative norms in litigation cases and in the drafting of international contracts. Giovanni Zarra is Assistant professor of international law and private international law and transnational litigation in the Department of Law of the Federico II University of Naples. **Insurance in Private International Law** Dec 05 2020 This book provides a much-needed analysis of this very important subject for international business lawyers, including discussion of the jurisdictional and choice of laws issues arising from cross-border contracts of insurance and reinsurance concluded by electronic means. This book is the first published in England to devote itself to a detailed analysis of the choice of laws rules in the E.C. Insurance Directives. It is aimed at academics and practitioners, at private international lawyers and at insurance lawyers. The private international law rules of the E.C. Insurance Directives deal with the applicable law to insurance contracts covering risks situated within the EU. They do not deal with the applicable law to reinsurance contracts and insurance contracts covering risks situated outside the EU. This should be ascertained by reference to the choice of laws provisions in the 1980 Rome Convention on the law applicable to contractual obligations. Detailed discussion of these rules is also provided, and proposals for reform suggested.

International Courts and the Development of International Law Aug 13 2021 This book contains a collection of essays by leading experts linked to the outstanding characteristics of the scholar in honour of whom it is published, Tullio Treves, who combines his academic background with his practical experiences of a negotiator of international treaties and a judge of an international tribunal. It covers international public and private law related to international courts and the development of international law. Under Article 38 of its Statute, the International Court of Justice can apply judicial decisions only as a "subsidiary means for the determination of rules of law". However, there are many reasons to believe that international courts and tribunals do play quite an important role in the progressive development of international law. There are a number of decisions which are inevitably recalled as the first step, or a decisive step, in the process of the formation of a new rule of customary international law. In these cases, can the judge be considered as a subsidiary of others? Are these cases compatible with the common belief that a judge cannot create law? Is this a peculiarity of international law, which is characterized by the existence of several courts but the lack of a legislator? Do decisions by different courts lead to the consequence of a fragmented international law? This volume provides the reader with an elaboration of various questions linked to the legislative role of courts. In their choices of subjects, some contributors have taken into account the general aspects of the development of international rules through court decisions or specific sectors of international law, such as human rights, international crimes, international economic law, environmental law and the law of the sea. Others have chosen the subject of the rules on jurisdiction and procedure of international courts. The question of the courts' role in the development of areas of law different from public international law, namely private international law and European Union law, has also been considered. The information and views contained in this book will be of great value to academics, students, judges, practitioners and all others interested in the public and private international law aspects of the link between international courts and the development of international law.

Codifying Choice of Law Around the World Oct 22 2019 Codifying Choice of Law Around the World chronicles, documents, and celebrates the extraordinary, massive codification of Private International Law (PrIL), or Conflict of Laws that has taken place in the last 50 years, from 1962-2012. During this period, the world has witnessed the adoption of nearly 200 PrIL codifications, EU Regulations, and international conventions--more than in all preceding years since the inception of PrIL. This book provides a horizontal comparison and discussion of these codifications and conventions, first by comparing the way they resolve tort and contract conflicts, and then by comparing the answers of these codifications to the fundamental philosophical and methodological dilemmas of PrIL. In the process, this book re-examines and dispels certain widely held assumptions about choice of law, and the art and science of codification in general. Written by Symeon C. Symeonides, a renowned PrIL and comparative law expert with extensive first-hand experience in drafting codifications and advising other drafters, Codifying Choice of Law Around the World will serve as an indispensable point of reference for any serious study or discussion of PrIL, and comparative law.

Private International Law Aspects of Corporate Social Responsibility Jan 24 2020 This book addresses one of the core challenges in the corporate social responsibility (or business and human rights) debate: how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights. However, ensuring access to remedy depends on a series of normative and judicial elements that become highly complex when disputes are transnational. In such cases, courts need to consider and apply different laws that relate to company governance, to determine the competent forum, to define which bodies of law to apply, and to ensure the adequate execution of judgments. The book also discusses how alternative methods of dispute settlement can relate to this topic, and the important role that private international law plays in access to remedy for corporate-related human rights abuses. This collection comprises 20 national reports from jurisdictions in Europe, North America, Latin America and Asia, addressing the private international law aspects of corporate social responsibility. They provide an overview of the legal differences between geographical areas, and offer numerous examples of how states and their courts have resolved disputes involving private international law elements. The book draws two preliminary conclusions: that there is a need for a better understanding of the role that private

international law plays in cases involving transnational elements, in order to better design transnational solutions to the issues posed by economic globalisation; and that the treaty negotiations on business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses, which could also help to identify and bridge the existing gaps that limit effective access to remedy. Adopting a comparative approach, this book appeals to academics, lawyers, judges and legislators concerned with the issue of access to remedy and reparation for corporate abuses under the prism of private international law.
