??? This edited book examines the contemporary regional security concerns in the Asia-Pacific recognizing the 'Butterfly effect', the concept that small causes can have large effects. 'the flap of a butterfly's wings can cause a typhoon halfway around the world'. For many Asia-Pacific states, domestic security challenges are at least as important as external security considerations. Recent events (both natural disasters and man-made disasters) have pointed to the inherent physical, economic, social and political vulnerabilities that exist in the region. Both black swan events and persistent threats to security characterize the challenges within the Asia-Pacific region. Transnational security challenges such as global climate change, environmental degradation, pandemics, energy security, supply chain security, resource scarcity, terrorism and organized crime are shaping the security landscape regionally and globally. The significance of emerging transnational security challenges in the Asia-Pacific Region impact globally and conversely, security developments in those other regions affect the Asia-Pacific region. At a time when Chinese policy makers appear to be rethinking China's historically close alliance relationship with North Korea, this volume gathers a diverse collection of original essays by some of China's leading experts on North Korea and China's North Korea policy. The inspirational story of one woman's journey from living a nightmare to chasing her dreams What do you need to escape your past and run, with

open arms, into your future? E. Vivienne Anderson tells her personal story of how she left the trauma of her childhood and early adulthood behind her by building the courage to embrace God's love and follow His path for her. Growing up in Jamaica, Anderson only knew pain and suffering. She was the victim of horrible sexual, physical, and psychological abuse. Her father and grandmother once buried her alive in a coffin to force her to submit to their practices of witchcraft and satanic worship. Through her nightmare of a childhood, Anderson saw glimmers of hope and a better life through occasional Pentecostal street meetings and through her imaginary friends that became the only ones she could trust with her feelings. She moved to America in her late teens but life continued to be full of heartache and danger. Anderson, once again, fell victim to physical and emotional abuse at the hands of the man in her life. Somehow, through all that suffering, Anderson was able to find hope. Just when she was at her lowest and darkest moment, she rediscovered a light... The Light. Once Anderson accepted the power of God and allowed Him to heal her soul and work through her, she began to find the way out of misery and into His glory. This story of courage and transformation will show you that with God, truly nothing is impossible. Discover how one woman overcame the worst life has to offer. Anderson's story will give you the courage to make the changes you need to feel the glory of God in your life, no matter what your past holds. Get inspired today! A rare insider's account of the inner workings of the Japanese economy, and the Bank of Japan's monetary policy, by a career central banker

The Japanese economy, once the envy of the world for its dynamism and growth, lost its shine after a financial bubble burst in early 1990s and slumped further during the Global Financial Crisis in 2008. It suffered even more damage in 2011, when a severe earthquake set off the Fukushima Daiichi nuclear disaster. However, the Bank of Japan soldiered on to combat low inflation, low growth, and high interest rates, and in many ways it served as a laboratory for actions taken by central banks in other parts of the world.

Masaaki Shirakawa, who led the bank as governor from 2008 to 2013, provides a rare insider's account of the workings of the Japanese economic and monetary policy during this period, and how it challenged mainstream economic thinking. My attempt to observe Comet ISON from the back garden. To observe, to study and to image the comet. The three volumes IFIP AICTE 438, 439, and 440 constitute the refereed proceedings of the International IFIP WG 5.7 Conference on Advances in

Production Management Systems, APMS 2014, held in Ajaccio, France, in September 2014. The 233 revised full papers were carefully reviewed and selected from 271 submissions. They are organized in 6 parts: knowledge discovery and sharing; knowledge-based planning and scheduling; knowledge-based sustainability; knowledge-based services; knowledge-based performance improvement, and case studies. The infamous Illuminati secret society represents the pinnacle of power in politics, banking, and the news media; but what about the entertainment industry? Do Hollywood's elite studios, producers, and celebrities have a secret agenda? Are they part of a covert conspiracy? Media analyst Mark Dice will show exactly how Hollywood uses celebrities and entertainment as a powerful propaganda tool to shape our culture, attitudes, behaviors, and to promote corrupt government policies and programs. You will see how the CIA and the Pentagon work hand in hand with Hollywood to produce blockbuster movies and popular television shows crafted to paint positive portraits of war, Orwellian government surveillance, unconstitutional agendas, and more. You'll also learn the strange and secret spiritual beliefs of the stars that fuel their egos and appetites for fame and wealth, making them perfect puppets for the controllers behind the scenes. And you will also discover the rare instances of anti-Illuminati celebrities who have dared to bite the hand that feeds them. Character Howard Beale once warned in the 1976 classic film *Network*, "This tube is the awesome God-damned force in the whole godless world, and woe is us if it ever falls in to the hands of the wrong people and unfortunately that is exactly what has happened. How

de Blasio's mayoral victory triggered a seismic shift in the nation's urban political landscape—and what it portends for cities in the future. In November 2013, a little-known progressive stunned the elite of New York City by capturing mayoralty by a landslide. Bill de Blasio's promise to end the "Tale of Two Cities" had struck a chord among ordinary residents still struggling to recover from the Great Recession. De Blasio's election heralded the advent of the most progressive New York City government in generations. Not since the legendary Fiorello La Guardia in the 1930s had so many populist candidates captured government office at the same time. Gotham, in other words, had been suddenly reclaimed the name of its people. How did this happen? De Blasio's victory, journalist legend Juan González argues, was not just a routine change of government but a popular rebellion against corporate-friendly policies that had dominated New York for decades. Reflecting that broader change, liberal Democrats Peduto in Pittsburgh, Betsy Hodges in Minneapolis, and Malcolm Walsh of Boston also won mayoral elections that same year, as did insurgent Ras Baraka in Newark the following year. This new generation of municipal leaders offers valuable lessons for those seeking grassroots reform. 2011 Updated Reprint. Updated Annually. Das Bildnis Papst Julius' I gehört zu Raffaels berühmtesten Werken. Das Porträt des Papstes ist 1511/12 entstanden und in mehreren Fassungen überliefert. Das Städel Museum konnte vor kurzem eine bisher unbekannte Version dieses Werks von der Hand Raffaels und seiner Werkstatt erwerben. Die Kabinettausstellung im Städel

und der begleitende Katalog werden sich dem Thema des Papstbildnisses aus unterschiedlichen Blickwinkeln nähern. Zunächst wird das für das Städel Museum erworbene Papstbildnis mit der bisher schon für Raffael und seine Werkstatt in Anspruch genommenen Fassung in den Uffizien Florenz sowie mit der Kopie Tizians im Palazzo Pitti zusammengeführt, um so den direkten Vergleich dieser engverwandten Gemälde zu ermöglichen. Parallel zu dieser Begegnung der Originale wird die Präsentation der gemäldetechnologischen Befunde der drei Gemäldeversionen aus Frankfurt, Florenz und London das Verhältnis der unterschiedlichen Bildfassungen diskutieren. (08.11.2013-16.02.2014). Today, the voices from the secular are hard at work removing any trace of religion from government and the law. Meanwhile, secular historians have successfully limited Christianity's contribution in history to Crusades and Inquisitions; as if that is all Christians have to speak for. The real story is quite different, primarily that everything good in Western Civilization has its roots in the Christian religion. How Christianity Built Western Civilization is the epic tale of how our Christian forefathers stood up to history's darkest forces, to forge a new way of life, grounded in the biblical worldview. Over the centuries it has become evident that Western Civilization has emerged as mankind's greatest achievement. It is here where the greatest political and economic systems were born, and here that we see the concept of human rights emerge, along with the modern scientific process and the greatest discoveries. It is in the West that

find the most advanced educational institutions, along with greatest charities, artistic masterpieces and architectural innovations. Is this a coincidence, or the deliberate result of a worldview? *How Christianity Built Western Civilization* answers this question with chapters on human rights, modern science, universal education, charity, art and architecture; focusing entirely on the revolutionary milestones and individuals that made these achievements possible. Each chapter unfolds chronologically, starting with the biblical foundation and moving through the work of the early and Medieval Church arriving at modern times. The author builds a compelling case demonstrating how Western Civilization would be indistinguishable from India, China or Africa today, if not for the teachings of Christ and the Bible. Exploring censorship imposed by corporate wealth and power, this book focuses on the energy industry in Wyoming, where coal, oil, and gas are pillars of the economy. The author examines how government bodies and public institutions have suppressed the expression of ideas that conflict with the financial interests of those who profit from fossil fuels. He reveals the ways in which university administrations, art museums, education boards, and research institutes have been coerced into destroying artwork, abandoning studies, modifying curricula, and firing employees. His book is an eloquent story of the conflict between private wealth and free speech. Providing more of the nation's energy than any other state, Wyoming is a sociopolitical lens that magnifies the conflicts in the American West. But the issues are relevant to any community that is dependent on a dominant industry—and wherever the liberties of citizens and the ethical

public officials are at risk. JEHOVAH SHAMMAH: THE LORD IS PRESENT OR THE LORD IS THERE The need for God's presence. In part I of the Perfect Redemption Plan, we explained that in the beginning, when God created Adam and Eve, they were in the very presence of God. They were living in Eden, the Garden of the Lord. God would come in the cool of the day and commune with them. Furthermore God was also with them, for He breathed Himself in them (Genesis 2:7). But when Adam and Eve sinned, they were banished [to banish means to condemn, to exile, or to compel to leave one's country, by the authority of the prince or government, either for life or for a limited time] from the presence of God, and God was no longer in them either. We have explained how God made it possible to get rid of sin in our life, by the death and resurrection of Jesus so that He could breathe Himself into us again, when we are born again and impute His righteousness unto us. Featuring scholarly perspectives from around the globe and drawing on the legacy of television studies, but with an eye toward the future, this authoritative collection examines both the thoroughly global nature of television and the multiple and varied experiences that constitute television in the twenty-first century. Companion chapters include original essays by some of the leading scholars of television studies as well as emerging voices on engaging television on six continents, offering readers a truly global range of perspectives. The volume features multidisciplinary analyses that offer models and guides for the study of global television, with approaches focused on the theories, audiences, content, culture, and institutions of television. A wide array of examples and case studies engage

transforming practices, technologies, systems, and texts constituting television around the world today, providing readers with a contemporary and multi-faceted perspective. In this volume, editor Shawn Shimpach has brought together an essential guide to understanding television in the world today, how it works and what it means – perfect for students, scholars, and anyone else interested in television, global media studies, and beyond. Beatrice Edwards, executive director of the organization representing Edward Snowden and four other NSA whistleblowers, argues that we now live in a Corporatized Security State, where the government is more interested in protecting the companies that serve it than the citizens who support it. Heavy domestic surveillance, political persecution of dissenters, the threat of indefinite detention codified into law—how did we get here? And is there a way out? Edwards details how intelligence agencies took advantage of 9/11 to illegitimately extend the government's reach. Corporations, she shows, were only too eager to sell them expensive surveillance technology, as well as share data on customers and employees using the bogus threat of an imminent “cyber war.” This is the Justice Department isn't going after the institutions responsible for the financial collapse of 2008—government and business are partners in crime. But Edwards offers a plan to fight back and restore transparency to government, keep personal information private, and make democracy a reality once again. Drawing on data collected between 2006 and 2012, the report provides recommendations and good practices regarding state asset recovery, and suggests specific actions for development agencies. My book, *Different Roots*, is about how I met my

The book tells the story of how we met and the everyday obstacles we face. Studying the life situations of trans persons reveals preceding and ongoing political, social, and cultural transformations. This ethnographic study concerns individuals in Andalusia, Southern Spain, who do not fit the sex and gender assigned to them at birth. Christoph Imhof thus investigates issues leading back to the repressive situation during the dictatorship of Franco and to contemporary endeavours and achievements regarding acceptance, citizenry, and self-determination. He highlights the pioneering role that Andalusia has played within Spain regarding trans issues since the late 1990s and shows how trans persons in Southern Spain have experienced the growing social, medical and legal acceptance of their gender non-conformity. The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries. Challenges associated with the analysis, security, sharing, storage, and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data. Big Data: Concepts, Methodologies, Tools, and Applications is a multi-volume compendium of research-based perspectives and solutions within the realm of large-scale and complex data. Taking a multidisciplinary approach, this publication presents exhaustive coverage of crucial topics in the field of big data, including diverse applications, storage solutions, analysis

techniques, and methods for searching and transferring large data sets, in addition to security issues. Emphasizing essential research in the field of data science, this publication is an indispensable reference source for data analysts, IT professionals, researchers, and academics. This volume traces the history of antisemitism from antiquity through contemporary manifestations of the discrimination of Jews. It documents the religious, sociological, political and economic contexts in which antisemitism thrived and thrives and shows how such circumstances served as support and reinforcement for a curtailment of the Jews' social status. The volume sheds light on historical processes of discrimination and identifies them as a key factor in the contemporary and future fight against antisemitism.

This study explores Iranian influence in Afghanistan and the implications for the United States after most U.S. forces departed Afghanistan in 2016. Iran has substantial economic, political, cultural, and religious leverage in Afghanistan. Although Iran will attempt to shape a post-2014 Afghanistan, Iran and the United States share core interests: to prevent the country

again becoming dominated by the Taliban and a safe haven for al Qaeda. The invisible hand of capitalism is broken. Economic and political forces are preventing markets from correcting themselves, and we're now living in an unprecedented age of oversupply. Governments and central banks across the developed world have tried every policy tool imaginable, yet economies remain sluggish or worse. How did we get here, and how can advanced nations compete and prosper once more? In this bold call to arms, economic policy expert Daniel Alpert argues that a global labor glut, excess productive capacity, and a rising ocean of cheap capital have kept the economies of the first world, and notably the United States, mired in underemployment and anemic growth. Distracted by a technology boom and a massive debt bubble in the 1990s and early 2000s, advanced nations failed to assess the ultimate impact of the torrent of labor and capital unleashed by former socialist economies. After the financial crisis of 2008, the United States and Europe joined an already sclerotic Japan in dire economic straits. Today, as the BRICs (Brazil, Russia, India, and China) and others poach jobs from Western Europe, the United States, and Japan, household incomes in the developed world continue to decline. Many policymakers believe in outdated supplyside economic remedies. They miss the connection between global oversupply and the lack of domestic investment and growth. But Alpert shows how they are intertwined: We cannot understand the housing bubble and financial crisis without appreciating how the rise of the emerging nations distorted the economies of rich countries. We can't chart a path for growth in the developed world without

recognizing that many of these distorting forces are still at work. The Age of Oversupply offers a bold, fresh approach to fixing the West's economic woes through large-scale fiscal stimulus measures, investments in infrastructure, and an aggressive private debt reduction plan. It also delivers a vigorous challenge to proponents of austerity economics.

Routledge Handbook of the Economics of European Integration provides readers with a brief but comprehensive overview of topics related to the process of European integration in the post-World War II period. Its short chapters reflect the most up-to-date and concise research written by a collective of experts on their own subjects. The purpose of this book is twofold. Firstly, the text illustrates the broad and diverse range of issues associated with European integration and lastly, the key approaches and findings are summarised.

Since institutional integration in Europe is an ongoing process with possibly frequent and sometimes rapid changes, the chapters are intended to focus on the key features of the economic analyses of these topics. A wide and diverse set of economic issues is of direct relevance for European integration. These topics cover various fields, ranging from the history of the European Economic and Monetary Union, EU Trade Policy and the stability of international trade, single market issues, fiscal, monetary and other policies, the crisis that faces the area, and institutions such as EU Council of Ministers. Not surprisingly, many of these issues have also been analysed from a European perspective. This handbook is designed to provide students, researchers, the public and policy makers with relevant and accessible knowledge of issues related to European integration and will provide the definitive overview of research

in the area. SNAPSHOT - Nxt, unsurpassable blockchain solutions is a collection of articles, which, after a short introduction to the concept of blockchain technology, looks at the history of Nxt, the world's first user-, and business oriented PoS blockchain 2.0 platform. From its tumultuous launch in 2013, the pros and cons of its distribution model and the anonymous inventor, BCNext, who handed over the source code to the community and gave them the responsibility to enhance the tech and ecosystem, it takes the reader on a journey through ups and downs, features, use cases, business projects and bank/government adoption of the tech. The multi million dollar fintech and blockchain industry advances at a rapid pace through years, so why is Nxt, an underfunded open source project, the most advanced? In 228 pages the articles contained in the book relate how a group of mostly anonymous people, inventors, cryptographers, economists and software developers set out to change the world. In Indiana Getting Started Garden Guide, internationally renowned gardening expert and Indiana native Shawna Coronado presents foolproof planting advice for over 150 species, handpicked for their ability to flourish in the Hoosier State. Business failure is not limited to start ups. Industry Watch (published by BDO Stoy Hayward, an accounting firm) 'predicts that 17,043 businesses will fail (in UK) in 2006, a further 4 per cent increase from 2005'. In America between 1990 and 2000, there were over 6.3 million business start-ups and over 5.7 million business shut-downs. Risk of failure can be greatly reduced through effective organizational design that encourages high performance and adaptability to changing circumstances. Organization design

a straightforward business process but curiously managers rarely talk about it and even more rarely take steps to consciously design or redesign their business for success. The new Economist guide explores the five principles of effective organization design, which are that it must be: driven by the business strategy and the operating context (not by a new system, a new leader wanting to make an impact, or some non-business reason). It involves holistic thinking about the organization for the future rather than for now and is not to be undertaken lightly - it is resource intensive even when going well. It will be seen as a fundamental process not a repair job. (Racing cars are designed and built. They are then kept in good repair. The rise of China has brought about a dramatic increase in the rate of migration from mainland China. At the same time, the Chinese government has embarked on a full-scale push for the internationalisation of Chinese media and culture. Media and communication have therefore become crucial factors in shaping the increasingly fraught politics of transnational Chinese communities. This book explores the changing nature of these communities, and reveals their dynamic and complex relationship to the media in a range of countries worldwide. Overall, the book highlights a number of ways in which China's "going global" policy interacts with other factors in significantly reshaping the content and contours of the diasporic Chinese media landscape. In doing so, this book constitutes a major rethinking of Chinese transnationalism in the twenty-first century.
