"One of the most momentous debuts in years: A transcendent novel that strikes a deep emotional chord, My Absolute Darling combines a page-turning female survival story, an arresting use of language, and a heart-wrenchingly powerful redemptive arc"-- Board book with tactile inserts. Birth to 3 yrs. A mother turtle swims to shore. She digs a hole in a dune where she lays one hundred eggs. Following her instinct, she covers the eggs with sand and slowly makes her way back to sea. What happens next, from eggs to hatchlings, is one of the most extraordinary occurrences in nature. For the eggs provide food for other animals, and the eggs that survive produce hatchlings that, again, provide food for birds and crabs. Even those hatchlings that make it to the ocean face an uncertain future. Lyrical text and dramatic paintings give young readers an understanding of how turtles give birth and how the young fight for survival in this winner of the Maryland Blue Crab Young Readers' Award. Greedy Monkey makes every effort to cheat Turtle out of the bananas that rightfully belong to her. Young readers will witness rare and extraordinary natural event as a baby loggerhead hatches from its shell. With nothing but the light of the moon to act as a guide, readers will follow the newborn turtles' harrowing attempts to outpace a series of predators on their march toward the glistening shore. After only narrowly avoiding hungry crabs, owls, and foxes, the turtle rides ocean waves to a calm clearing. Following a moment of peace in the still ocean water, the turtle joins the rest of its pack on a dive into the moonlit sea to continue the voyage home. Told with a beautiful, lyrical rhyming sequence, this book introduces readers to the birth cycle of a loggerhead sea turtle. Through the newborn turtle's eyes, both kids and adults will marvel at the majestic, and sometimes dangerous seaside landscape from a perspective rarely seen before. A turtle emerges from the sea to lay her eggs in the sand. In spite of the country's vast coastline and millions being dependent on marine resources for their livelihoods, such species and habitats have been largely neglected in writings on wildlife. From Soup to Superstar

provides the first comprehensive account of marine conservation in India, focusing on sea turtles, which are at once a fishery resource, a religious symbol and a conservation icon. Worshipped as Kurma, the incarnation of Vishnu, by several communities, these creatures have been part of folklore and mythology for over 2,000 years. Until the 1970s, there were large- and small-scale turtle fisheries in Odisha and the Gulf of Mannar, while eggs and meat were consumed along the rest of the coast. Since then, several conservation programmes have been led in these regions by naturalists, scientists, activists and concerned citizens with diverse, often conflicting, approaches. Globally, attention has centred on the mass-nesting beaches in Odisha, where over 1,00,000 turtles may nest simultaneously. New threats have emerged and elicited responses at local, national and international levels. Bringing together a range of issues and actors that have affected the world of sea turtles, filled with fascinating insights into scientific research and human-animal ecologies, this is a definitive chronicle of the efforts that have been made to protect these mysterious creatures in the last fifty years.
