Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Proceedings of the American Institute of Electrical Engineers Nov 30 2020 Vols. for 1887-1946 include the preprint pages of the institute's Transactions.

From NYC Lower East Side To NASA Satellite Operations Manager Apr 16 2022 What was life like growing up on the Lower East Side of NYC during the Great Depression? Can you imagine it? For adults, of course, it was harsh; for a young boy like me, born in 1924, it was not as bad as you think. I actually had fun playing sports and games you probably never heard of. Learn about them. My vivid recollection paints a broad view of the Lower East Side for you to see what it was like: social activity, sports activity, bread lines, patriotism, politics, professional sports interest compare it to your experiences. I was fortunate not to be hungry for food but hungry to experience the wonders of our country. Learn how I broke out of the Lower East Side shell. A college education was hardly a goal among the youth in my community, but I made it at a young age, graduating from the City College of NY at twenty. I had five industrial engineering jobs, hardly the experience that would prepare me to manage NASA satellites operations. It did not, but by a quirk, I became operations manager of a series of NASA weather satellites called Nimbus, research satellites that provided many benefits to society you would be interested in learning about. So why not also learn how satellites operate? I describe that in simple terms. Of course this book is my life story my story of raising a family, having a productive career, paying back to society through volunteerism while keeping close to Judaism, and enjoying my senior years while still being productive at consulting work.

Network World Nov 18 2019 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

Digitalization and Management Innovation Jan 21 2020 The digital era has brought about important changes that continue to affect all our lives. Efficient management and storage of digital information has become crucial, as has the ability to access that information quickly and efficiently, and priorities are to allow for the saving of digital data in many different ways, and to avoid the loss of information in the event of a malfunction. This book presents the 65 papers presented at DMI2022, the first in the new annual conference series Digitalization and Management Innovation (DMI), held as a hybrid event in Beijing, China, on 26 November 2022. A total of 190 submissions were received for the conference, and the papers presented here were selected after careful and conscientious review, bearing in mind the breadth and depth of the research topics falling within the scope of digital and management innovation and resulting in an acceptance rate of 34%. Topics covered include digital transformation, supply chains, business models, and block chain, enterprises, banking, and sustainability, as well as policy in artificial intelligence, the gig economy, the post-epidemic era, green supply, citizenship behavior, human resource management, human relationships, agriculture, and environmental matters. Presenting original ideas and results of general significance and supported by clear reasoning, and compelling evidence and methods, the book will be of interest to all those whose work involves the management of digital data.
