Python Testing with Pytest Automate the Boring Stuff with Python, 2nd Edition

The purity and simplicity of Gregorian chant is what fed the musical and liturgical life of Christianity for more than a millennium before there were any Protestants. But after the reforms of the Vatican II concils in the 1960s, chant went into disuse. Gregorian chant is back, and more popular than it has been in the last forty years. This handy book is for musicians of all denominations and levels of ability to sing chant, and to understand it more than ever before. New for the second edition of this classic work are: an entirely new interior design that is easier to navigate and read, many additional chants, and historical and spiritual introductions to each of them. Book Design Made Simple gives DIY authors, small presses, and graphic designers--novices and experts alike--the power to design their own books. It's the first comprehensive book of its kind, explaining every step from installing Adobe(R) InDesign(R) right through to sending the files to press. For those who want to design their own books but have little idea how to proceed, Book Design Made Simple is a semester of book design instruction plus a publishing class rolled into one.

Let two experts guide you through the process with easy step-by-step instructions, resulting in a professional-looking top-quality book CD on Differential Diagnosis, shows the interpretation of common lab tests and patient symptoms and signs, also facilitates searching several reference services for additional information. The first edition of Assessment Clear and Simple quickly became the essential go-to guide for anyone who participates in the assessment process in higher education. With the increased pressure to perform assessment to demonstrate accountability, Assessment Clear and Simple is needed more than ever. This second edition of the classic resource offers a concise, step-by-step guide that helps make assessment simple, cost-efficient, and useful to an institution. It contains effective strategies for meeting the requirements of accreditation agencies, legislatures, review boards, and others, while emphasizing and showing how to move from data to actions that improve student learning. This thoroughly revised and updated edition includes many new or expanded features, including: Illustrative examples drawn from the author's experience consulting with more than 350 institutions A basic, no-frills assessment plan for departments and for

general education Tips on how to integrate portfolios and e-portfolios into the assessment process Suggestions for using rubrics and alternatives to rubrics, including doing assessment for multidisciplinary work Clear instructions on how to construct a coherent institution-wide assessment system and explain it to accreditors Ideas for assigning responsibility for general education assessment Strategies for gathering information about departmental assessment while keeping the departmental workload manageable Information on how to manage assessment in times of budgetary cutbacks Praise for the Second Edition of *Assessment Clear and Simple* "Walvoord's approach to assessment is wonderfully straightforward; it is also effective in facilitating faculty engagement in assessment. We've applied a number of her methods to our campus assessment efforts with success. This book makes assessment both manageable and useful in improving and enhancing student learning."—Martha L. A. Stassen, director of assessment, University of Massachusetts, Amherst, and president, New England Educational Assessment Network (NEEAN) "Walvoord's work clearly presents the basics for getting started in assessment of student learning while honestly addressing the complexities of assessment when driven by faculty passion for student learning. This book

is a valuable resource for the novice as well as the developing experts who are leading their institutions in academic assessment."—Bobbi Allen, faculty assessment director, Delta College Make learning the multiplication tables easy and entertaining for kids of all learning styles! Packed with teacher-tested games, rhymes, songs, stories, mnemonic devices, hands-on reproducibles, and so much more. For use with Grades 2-4. Now fully-revised and updated, this second edition of *ACT Made Simple* includes new information and chapters on self-compassion, flexible perspective taking, working with trauma, and more. Why is it so hard to be happy? Why is life so difficult? Why do humans suffer so much? And what can we realistically do about it? No matter how rewarding your job, as a mental health professional, you may sometimes feel helpless in the face of these questions. You are also well aware of the challenges and frustrations that can present during therapy. If you're looking for ways to optimize your client sessions, consider joining the many thousands of therapists and life coaches worldwide who are learning acceptance and commitment therapy (ACT). With a focus on mindfulness, client values, and a commitment to change, ACT is proven-effective in treating depression, anxiety, stress, addictions, eating disorders, schizophrenia, borderline personality disorder (BPD), and myriad other psychological issues. It's also a revolutionary

new way to view the human condition—packed full of exciting new tools, techniques, and strategies for promoting profound behavioral change. A practical primer, ideal for ACT newcomers and experienced ACT professionals alike, *ACT Made Simple* offers clear explanations of the six ACT processes and a set of real-world tips and solutions for rapidly and effectively implementing them in your practice. This book gives you everything you need to start using ACT with your clients for impressive results. Inside, you'll find: scripts, exercises, metaphors, and worksheets to use with your clients; a session-by-session guide to implementing ACT; transcripts from therapy sessions; guidance for creating your own therapeutic techniques and exercises; and practical tips to overcome "therapy roadblocks." This book aims to take the complex theory and practice of ACT and make it accessible and enjoyable for therapists and clients. *ACT Made Simple* is a comprehensive guide to a powerful, evidence-based approach to psychological well-being—full of tools, techniques, and strategies to maximize human potential for a rich and meaningful life. Do less work when testing your Python code, but be just as expressive, just as elegant, and just as readable. The `pytest` testing framework helps you write tests quickly and keep them readable and maintainable - with no boilerplate code. Using a robust yet simple fixture model, it's just as easy to write

small tests with pytest as it is to scale up to complex functional testing for applications, packages, and libraries. This book shows you how. For Python-based projects, pytest is the undeniable choice to test your code if you're looking for a full-featured, API-independent, flexible, and extensible testing framework. With a full-bodied fixture model that is unmatched in any other tool, the pytest framework gives you powerful features such as assert rewriting and plug-in capability - with no boilerplate code. With simple step-by-step instructions and sample code, this book gets you up to speed quickly on this easy-to-learn and robust tool. Write short, maintainable tests that elegantly express what you're testing. Add powerful testing features and still speed up test times by distributing tests across multiple processors and running tests in parallel. Use the built-in assert statements to reduce false test failures by separating setup and test failures. Test error conditions and corner cases with expected exception testing, and use one test to run many test cases with parameterized testing. Extend pytest with plugins, connect it to continuous integration systems, and use it in tandem with tox, mock, coverage, unittest, and doctest. Write simple, maintainable tests that elegantly express what you're testing and why. What You Need: The examples in this book are written using Python 3.6 and pytest 3.0. However, pytest 3.0 supports Python 2.6, 2.7, and Python

3.3-3.6. Chinese Made Easy adopts a new approach to teaching Chinese as a second or foreign language. It is designed for young students taking GCSE/IGCSE/A-Level Mandarin Chinese Exams (UK), SAT II / AP-Chinese Examinations (USA), IB Chinese Exam, Australian Chinese exams, HSK (Mainland China), or for those students who are starting to learn Chinese on their own. Chinese Made Easy has two levels: level 1-Book 1, 2 and 3; and level 2-Book 4 and 5. After completing this series, learners will acquire a vocabulary of approximately 1,700 Chinese characters and several thousand phrases. This course features task-based learning coupled with a focus on form and function. Textbooks are in full color and it includes both simplified and traditional Chinese characters in its vocabulary lists. For almost four decades, Made Simple books have set the standard for continuing education and home study. In answer to the changing needs of today's marketplace, the Made Simple series for the '90s presents a thoroughly up-to-the-minute portfolio of skills, information, and experience, with revised and updated editions of bestselling titles, plus a whole range of new subjects from personal finance to office management to desktop publishing. B & W illustrations throughout

What's happening to me? This book translates anxiety from the jargon of psychology into concrete experiences that children can relate to. Children and their

parents will understand the biological and emotional components of anxiety responsible for the upsetting symptoms they experience.

Please Explain Anxiety to Me gives accurate physiological information in child friendly language. A colorful dinosaur story explains the link between brain and body functioning, followed by practical therapeutic techniques that children can use to help themselves. Children will learn that they can handle most issues if they are explained at their developmental level.

Understand the brain/body connection underlying anxiety. Identify with the examples given. Find comfort and reassurance in knowing that others have the same experience. Be provided with strategies and ideas to help them change their anxiety responses. Be able to enjoy childhood and to give up unnecessary worrying.

Therapists and Educators Praise "Please Explain Anxiety To Me" "On any given day, around thirty percent of my patients have anxiety related symptoms. The simplicity and completeness of the explanations and treatment of anxiety given in this book is remarkable. Defining the cause, treating the core symptoms, and most importantly bringing it to a child's level accompanied by wonderful illustrations, is an incredible feat. I will definitely use this book in my practice."

Zev Ash, M.D. F.A.A.P., Pediatrician "Anxiety is, of course, a complicated neuro-physiological process but it has

been reduced to understandable terms in this brilliantly illustrated book for children. I would go even further and say that there are adults who could benefit from the straightforward approach." Rick Ritter, MSW, author of "Coping with Physical Loss and Disability" "This excellent book is perfect for parents to read and discuss with their children. It's also perfect for school professionals to use in the school setting." Herb R. Brown, Ed.D., Superintendent of Schools Oceanside Public Schools, New York "...A charming--and calming--explanation of anxiety that will help both children and their parents turn their internal worry switches to the OFF position." Ellen Singer, New York Times-acclaimed bestselling author Learn more at [www.DrZelinger.com](http://www.DrZelinger.com) From the "Growing With Love" Series at Loving Healing Press [www.LHPress.com](http://www.LHPress.com) SEL036000, Self-Help : Anxieties & Phobias PSY006000 Psychology : Psychotherapy - Child & Adolescent JNF053050 Juvenile Nonfiction : Social Issues - Emotions & Feelings Modern-day fly fishing, like much in life, has become exceedingly complex, with high-tech gear, a confusing array of flies and terminal tackle, accompanied by high-priced fishing guides. This book reveals that the best way to catch trout is simply, with a rod and a fly and not much else. The wisdom in this book comes from a simpler time, when the premise was: the more you know, the less you need. It teaches the reader how to discover where the fish

are, at what depth, and what they are feeding on. Then it describes the techniques needed to present a fly at that depth, make it look lifelike, and hook the fish. With chapters on wet flies, nymphs, and dry flies, its authors employ both the tenkara rod as well as regular fly fishing gear to cover all the bases. Illustrated by renowned fish artist James Prosek, with inspiring photographs and stories throughout, Simple Fly Fishing reveals the secrets and the soul of this captivating sport. When Fortune Magazine estimated that 70% of all strategies fail, it also noted that most of these strategies were basically sound, but could not be executed. The central premise of Strategic Project Management Made Simple is that most projects and strategies never get off the ground because of ad hoc, haphazard, and obsolete methods used to turn their ideas into coherent and actionable plans. Strategic Project Management Made Simple is the first book to couple a step-by-step process with an interactive thinking tool that takes a strategic approach to designing projects and action initiatives. Strategic Project Management Made Simple builds a solid platform upon four critical questions that are vital for teams to intelligently answer in order to create their own strong, strategic foundation. These questions are: 1. What are we trying to accomplish and why? 2. How will we measure success? 3. What other conditions must exist? 4. How do we get there? This fresh

approach begins with clearly understanding the what and why of a project - comprehending the bigger picture goals that are often given only lip service or cursory reviews. The second and third questions clarify success measures and identify the risky assumptions that can later cause pain if not spotted early. The how questions - what are the activities, budgets, and schedules - comes last in our four-question system. By contrast, most project approaches prematurely concentrate on the how without first adequately addressing the three other questions. These four questions guide readers into fleshing out a simple, yet sophisticated, mental workbench called "the Logical Framework" - a Systems Thinking paradigm that lays out one's own project strategy in an easily accessible, interactive 4x4 matrix. The inclusion of memorable features and concepts (four critical questions, LogFrame matrix, If-then thinking, and Implementation Equation) make this book unique. In terms of simple and complex systems, it is a whole new world out there. At the initial publication of this book, fourteen years ago, the web was in its infancy, DVDs did not exist, cell phones were few and far between, and the information superhighway was just a blip upon the horizon. If you used the terms "social engineering," you were most likely a political scientist, and if you were "phishing" you might be listening to a rock band. The second edition of a bestseller,

Human Factors in Simple and Complex Systems provides the necessary understanding of the breadth and depth of human factors issues that influence the design, implementation, and evaluation of products and systems. Emphasizing the close relationship between basic theory and application, the authors delineate a framework for the research process, present an integrated view of the current state of knowledge, and examine how these factors can be applied to system design. The new edition addresses such concepts as situation awareness and highlights topics of interest, with a special focus on computer applications and human-computer interaction. See what's new in the Second Edition New topics, such as situational awareness, that capture the tremendous changes in human factors and ergonomics Tightly integrates basic research and application, strengthening the link between knowledge and practice Each chapter includes a separate box that discusses a topic of current interest related to human interaction with computers and recent technology Demonstrating a general approach to solving a broad range of system problems, the book provides coverage of the theoretical foundation on which the discipline of human factors is built. Structured around human information processing, it covers the full range of contemporary human factors and ergonomics, then shows you how to apply them.

FOREWORD BY GUY

KAWASAKI Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net — presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making "slide presentations" in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations. In this timeless bestseller, you'll get the motivation and know-how for building up a big stash of emergency cash, getting out of debt, making sure you never run out of money, and avoiding the 11 worst budget traps (that'll ruin your financial plans if you let them!) Find out the most important things that you can do to take control of your money and pay off debt. Get the budget how-to, tools, and knowledge you need to finally get ahead. You'll learn a complete budget system that works for beginners and takes only 15 minutes per week to maintain. This is a

straightforward budget planning method that will completely transform your finances, and eliminate your money worries once and for all. Learn how to make a budget that actually works, and transform your financial life forever! A classic text and standard reference for a generation, this volume covers all undergraduate algebra topics, including groups, rings, modules, Galois theory, polynomials, linear algebra, and associative algebra. 1985 edition. Convenience and eating healthfully can go hand in hand, and with the American Heart Association Quick & Easy Cookbook, 2nd Edition, you can spend less time in the kitchen and still achieve great results at the table. This revised and expanded edition of the classic cookbook includes more than 200 speedy dishes, of which 60 are brand new. Prep and cooking times are provided for all recipes, so you'll know how much time you'll need in the kitchen. And rest assured, no dish takes longer than 20 minutes to prepare, and many recipes can be made in 30 minutes from start to finish. In fewer than 10 minutes, you can start your day with Confetti Scrambler or Mandarin Breakfast Parfaits. No one will guess you whipped up dinner in 20 minutes when you serve Chicken with Tarragon Oil, Baked Tilapia with Pineapple Reduction, or Beef Tenderloin on Herbed White Beans. When meals are this simple and good for you, even appetizers, snacks, sides, and desserts can be on the docket. You'll find recipes for

Homemade Corn Tortilla Chips, Edamame Salsa, Warm Chicken and Papaya Salad, Citrus Kale with Dried Cranberries, Chocolate-Banana Mini Cupcakes, Grilled Peaches with Almond Liqueur, and much more! Make the most of your time in the kitchen and in the grocery store with helpful tools such as:

- Meal-planning strategies, including a sample dinner plan and a chart template to customize your own meals week-by-week
- Guidelines for maximizing nutritious foods and minimizing nutrient-poor foods
- Shopping strategies, including lists of health-smart staples
- Tips on organizing your kitchen for the greatest efficiency
- Quick-cooking techniques and short prep tricks

With this new edition of one of the American Heart Association's first and most popular cookbooks, you'll have a resource right at your fingertips for making your own quick and easy meals that will offer you fast, healthy food. Connect and communicate with your baby before they can even speak. This revised and updated features an extra 30 pages of signs and illustrations.

Java is a programming language designed for use on networks, in particular the Internet, and can also be used to write full-scale applications. It is based upon C++ and is very similar in its style and structure. Java Made Simple 2nd edition concentrates on getting the reader started and assumes no prior programming knowledge. Once the essentials have been mastered, it provides the confidence to go deeper into the language and

broaden and develop invaluable programming skills. "A complete manual for learning sign language in sentence form"--Cover. If you're a technical recruiter who wants to keep your skills up to date in the competitive field of technical resource placement, you need a detailed guidebook to outpace competitors. This technical skills primer focuses on technology fundamentals—from basic programming terms to big data vocabulary, network lingo, operating system jargon, and other crucial skill sets. Topics covered include

- sample questions to ask candidates,
- types of networks and operating systems,
- software development strategies,
- cloud systems administration and DevOps,
- data science and database job roles, and
- information security job roles.

Armed with indispensable information, the alphabet soup of technology acronyms will no longer be intimidating, and you will be able to analyze client and candidate requirements with confidence. Written in clear and concise prose, *Technology Made Simple for the Technical Recruiter* is an invaluable resource for any technical recruiter. Forecasting is required in many situations. Stocking an inventory may require forecasts of demand months in advance. Telecommunication routing requires traffic forecasts a few minutes ahead. Whatever the circumstances or time horizons involved, forecasting is an important aid in effective and efficient planning. This textbook provides a

comprehensive introduction to forecasting methods and presents enough information about each method for readers to use them sensibly.

*Biostatistics for Practitioners: An Interpretative Guide for Medicine and Biology* deals with several aspects of statistics that are indispensable for researchers and students across the biomedical sciences. The book features a step-by-step approach, focusing on standard statistical tests, as well as discussions of the most common errors. The book is based on the author's 40+ years of teaching statistics to medical fellows and biomedical researchers across a wide range of fields. Discusses how to use the standard statistical tests in the biomedical field, as well as how to make statistical inferences (t test, ANOVA, regression etc.) Includes non-standards tests, including equivalence or non-inferiority testing, extreme value statistics, cross-over tests, and simple time series procedures such as the runs test and Cusums. Introduces procedures such as multiple regression, Poisson regression, meta-analysis and resampling statistics, and provides references for further studies.

*Basic Groupwork* is a simple, practical guide to the processes of groupwork. This new edition has been extensively updated and revised to reflect the changes which have taken place in society and social behaviour since it was first published in 1978, but in essence it remains an accessible and friendly text for the novice practitioner. In

logical sequence the book follows the progress of one group from inception to close and exposes how groups work. Basic group processes explained include: how individuals bring their personal habitual responses to situations into a group how group constraints enhance or restrain group behaviour and achievement how a group is affected by the way in which it has originated how leadership and membership roles interact. Basic Groupwork provides students with a sound and solid basis for any kind of groupwork, in any context. Making Simple Robots is based on one idea: Anybody can build a robot! That includes kids, school teachers, parents, and non-engineers. If you can knit, sew, or fold a flat piece of paper into a box, you can build a no-tech robotic part. If you can use a hot glue gun, you can learn to solder basic electronics into a low-tech robot that reacts to its environment. And if you can figure out how to use the apps on your smart phone, you can learn enough programming to communicate with a simple robot. Written in language that non-engineers can understand, Making Simple Robots helps beginners move beyond basic craft skills and materials to the latest products and tools being used by artists and inventors. Find out how to animate folded paper origami, design a versatile robot wheel-leg for 3D printing, or program a rag doll to blink its cyborg eye. Each project includes step-by-step directions as well as clear diagrams and photographs.

And every chapter offers suggestions for modifying and expanding the projects, so that you can return to the projects again and again as your skill set grows. Described by the author as "a slightly autobiographical and heavily biased book about investing", Simple But Not Easy won fans among both professional and private investors alike when first released in 2007. The theme of the book is that investment is simpler than non-professionals think it is, in that the rudiments can be expressed in ordinary English and picked up by anybody. It is not a science. But investment is also difficult. People on the outside tend to think that anyone on the inside should be able to do better than the market indices. This is not so. Picking the managers who are likely to do better is a challenge. Richard Oldfield begins with a detailed confession of some of his worst mistakes and what they have taught him. He discusses the different types of investment, why fees matter, and the importance of measuring performance properly. He also outlines what to look for (and what not to look for) in an investment manager, when to fire a manager, and how to be a successful client. A cult classic for its candid confessions and sparkling wit, this extended edition of Simple But Not Easy - featuring a new author's preface and a substantial afterword - remains an indispensable companion for all those interested in the rewarding but enigmatic pursuit of investing. Easy to

understand and fun to read, this updated edition of Introducing Python is ideal for beginning programmers as well as those new to the language. Author Bill Lubanovic takes you from the basics to more involved and varied topics, mixing tutorials with cookbook-style code recipes to explain concepts in Python 3. End-of-chapter exercises help you practice what you've learned. You'll gain a strong foundation in the language, including best practices for testing, debugging, code reuse, and other development tips. This book also shows you how to use Python for applications in business, science, and the arts, using various Python tools and open source packages. Described by the author as "a slightly autobiographical and heavily biased book about investing", Simple But Not Easy has plenty of interest to the experienced professional, and is aimed also at the interested amateur investor. The theme of the book is that investment is simpler than non-professionals think it is in that the rudiments can be expressed in ordinary English, and picked up by anybody. It is not a science. But investment is also difficult. People on the outside tend to think that anyone on the inside should be able to do better than the market indices. This is not so. Picking the managers who are likely to do better is a challenge. Richard Oldfield begins with a candid confession of some of his worst mistakes and what they have taught him. He discusses the different types of investment, why fees

matter, and the importance of measuring performance properly. He also outlines what to look for, and what not to look for in an investment manager, when to fire a manager, and how to be a successful client. Your business reputation can take years to build—and mere minutes to destroy. The range of business threats is evolving rapidly but your organization can thrive and gain a competitive advantage with your business vision for enterprise risk management. Trends affecting markets—events in the global financial markets, changing technologies, environmental priorities, dependency on intellectual property—all underline how important it is to keep up to speed on the latest financial risk management practices and procedures. This popular book on enterprise risk management has been expanded and updated to include new themes and current trends for today's risk practitioner. It features up-to-date materials on new threats, lessons from the recent financial crisis, and how businesses need to protect themselves in terms of business interruption, security, project and reputational risk management. Project risk management is now a mature discipline with an international standard for its implementation. This book reinforces that project risk management needs to be systematic, but also that it must be embedded to become part of an organization's DNA. This book promotes techniques that will help you implement a

methodical and broad approach to risk management. The author is a well-known expert and boasts a wealth of experience in project and enterprise risk management. Easy-to-navigate structure breaks down the risk management process into stages to aid implementation. Examines the external influences that bring sources of business risk that are beyond your control. Provides a handy chapter with tips for commissioning consultants for business risk management services. It is a business imperative to have a clear vision for risk management. Simple Tools and Techniques for Enterprise Risk Management, Second Edition shows you the way. A guide to ACT: the revolutionary mindfulness-based program for reducing stress, overcoming fear, and finding fulfilment – now updated. International bestseller, 'The Happiness Trap', has been published in over thirty countries and twenty-two languages. NOW UPDATED. Popular ideas about happiness are misleading, inaccurate, and are directly contributing to our current epidemic of stress, anxiety and depression. And unfortunately, popular psychological approaches are making it even worse! In this easy-to-read, practical and empowering self-help book, Dr Russ Harries, reveals how millions of people are unwittingly caught in the 'The Happiness Trap', where the more they strive for happiness the more they suffer in the long term. He then provides an effective means to

escape through the insights and techniques of ACT (Acceptance and Commitment Therapy), a groundbreaking new approach based on mindfulness skills. By clarifying your values and developing mindfulness (a technique for living fully in the present moment), ACT helps you escape the happiness trap and find true satisfaction in life. Mindfulness skills are easy to learn and will rapidly and effectively help you to reduce stress, enhance performance, manage emotions, improve health, increase vitality, and generally change your life for the better. The book provides scientifically proven techniques to: reduce stress and worry; rise above fear, doubt and insecurity; handle painful thoughts and feelings far more effectively; break self-defeating habits; improve performance and find fulfilment in your work; build more satisfying relationships; and, create a rich, full and meaningful life. Since the original publication of this seminal work, acceptance and commitment therapy (ACT) has come into its own as a widely practiced approach to helping people change. This book provides the definitive statement of ACT--from conceptual and empirical foundations to clinical techniques--written by its originators. ACT is based on the idea that psychological rigidity is a root cause of a wide range of clinical problems. The authors describe effective, innovative ways to cultivate psychological flexibility by detecting and targeting six key processes:

defusion, acceptance, attention to the present moment, self-awareness, values, and committed action. Sample therapeutic exercises and patient-therapist dialogues are integrated throughout. New to This Edition \*Reflects tremendous advances in ACT clinical applications, theory building, and research. \*Psychological flexibility is now the central organizing focus. \*Expanded coverage of mindfulness, the therapeutic relationship, relational learning, and case formulation. \*Restructured to be more clinician friendly and accessible; focuses on the moment-by-moment process of therapy. Data Resource Data provides the complete detailed data resource model for understanding and managing data as a critical resource of the organization. It is not necessary to know how to do a statistical analysis to critically appraise a paper. However, it is necessary to have a grasp of the basics, of whether the right test has been used and how to interpret the resulting figures. Short, readable, and useful, this book provides the essential, basic information without becoming bogged down in the Data Modeling Made Simple will provide the business or IT professional with a practical working knowledge of data modeling concepts and best practices. This book is written in a conversational style that encourages you to read it from start to finish and master these ten objectives: Know when a data model is needed and which type of data model is most effective for each

situation Read a data model of any size and complexity with the same confidence as reading a book Build a fully normalized relational data model, as well as an easily navigatable dimensional model Apply techniques to turn a logical data model into an efficient physical design Leverage several templates to make requirements gathering more efficient and accurate Explain all ten categories of the Data Model Scorecard Learn strategies to improve your working relationships with others Appreciate the impact unstructured data has, and will have, on our data modeling deliverables Learn basic UML concepts Put data modeling in context with XML, metadata, and agile development Book Review by Johnny Gay In this book review, I address each section in the book and provide what I found most valuable as a data modeler. I compare, as I go, how the book's structure eases the new data modeler into the subject much like an instructor might ease a beginning swimmer into the pool. This book begins like a Dan Brown novel. It even starts out with the protagonist, our favorite data modeler, lost on a dark road somewhere in France. In this case, what saves him isn't a cipher, but of all things, something that's very much like a data model in the form of a map! The author deems they are both way-finding tools. The chapters in the book are divided into 5 sections. The chapters in each section end with an exercise and a list of the key points covered to reinforce what

you've learned. I find myself comparing the teaching structure of the book to the way most of us learn to swim. A guide to breast cancer features a question and answer format, and includes questions such as, "How serious is my cancer?", "Who will help with my cancer treatment?", and "What's the best way to treat my breast cancer?" Whether you are planning a romantic Italian getaway, packing a knapsack for your junior year abroad, or just want to engage your Italian business associate in everyday conversation, Italian Made Simple is the perfect book for any self-learner. Void of all the non-essentials and refreshingly easy to understand, Italian Made Simple includes: \* basics of grammar \* vocabulary building exercises \* pronunciation aids \* common expressions \* word puzzles and language games \* contemporary reading selections \* Italian culture and history \* economic information \* Italian-English and English-Italian dictionaries Complete with drills, exercises, and answer keys for ample practice opportunities, Italian Made Simple will soon have you speaking Italian like a native. The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or

updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate

similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python, 2nd Edition*.
