This book details the outcomes of new research focusing on climate risk related to hurricanes. Topics include numerical simulation of tropical cyclones, through tropical cyclone hazard estimation to damage estimates and their implications for commercial risk. Inspired by the 6th International Summit on Hurricanes and Climate Change: From Hazard to Impact, this book brings together leading international academics and researchers, and provides a source reference for both risk managers and climate scientists for research on the interface between tropical cyclones, climate and risk. The histories of six generations of the Strozzi, Gondi, Guicciardini, and Capponi families are traced from the fifteenth to the mid-sixteenth centuries by focusing on the family household as defined by the economic bonds reflected in account books. These four families were among the best known of the city's patriciate and were influential in affairs of the city. Their histories serve as case studies in seeking to determine the nature of the patrician family as a specific kind of social institution and to assess its importance in Florentine history. A concluding chapter attempts to relate the changing composition of the family to the general development of Renaissance civilization.

Originally published in 1968. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. *Climate Change: Observed Impacts on Planet Earth, Third Edition*, brings together top global researchers across many disciplines to provide a comprehensive review on the complex issue of climate change and weather patterns. The third edition continues its tradition of focusing on the science and evidence on this highly politicized topic. Every chapter is updated, with this new edition featuring new chapters on topics such as glacier melt, the impacts of rising temperatures, extreme weather, modeling techniques, biodiversity, and more. This book is essential for researchers, environmental managers, engineers, and those whose work is impacted by, or tied to, climate change and global warming. Provides a comprehensive resource on climate change and weather patterns, ranging from causes and indicators to modeling and adaptation. Covers the Jet Stream, catastrophic modeling, extreme weather, the carbon cycle, socioeconomic impacts, biological diversity, deforestation and global temperature. Contains 25 updated chapters and 10 new chapters, all written by global experts who provide a current overview of the state of knowledge on climate change across a wide array of disciplines.

Lupara bianca ('White Shotgun') -- an Italian term that refers to a Mafia-style killing, in which no trace of the victim can be found. For thirty years, prize-winning Sicilian journalist Attilio Bolzoni has reported on the shadowy activities of Cosa Nostra. Now, for the first time, he has collected together a powerful anthology of rare interviews, court proceedings and transcripts of phone taps that together capture the essence of this most hidden of secret societies. From the 'traditional'

Mafia of the early 20th Century to the 'Maxi' show-trials of the 1980s and beyond, *White Shotgun* is both a history of modern Sicilian crime, and a book about the twisted logic and language of Cosa Nostra. From the most humble of foot soldiers to famous pentiti ('grasses') and top-level Bosses, this is a portrait of the men who live by a code of silence -- in their own words. First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company. This volume offers new insights into the self-perceptions, strategies, and rituals through which early modern institutions functioned. Its wide range and its comparative vision of the nature of institutions prompts a new interpretation of the role of institutions in society. With contributions by Florence Hsia, Ian Anders Gadd, Gayle K. Brunelle, Christopher Carlsmith, Susan E. Brown, Victor Morgan, Steve Hindle, Janelle Day Jenstad, Eve Rosenhaft, Reed Benhamou, James Shaw, Kristine Haugen. This book provides a discussion of the philosophy of being according to three major traditions in Western philosophy, the Analytic, the Continental, and the Thomistic. The origin of the point of view of each of these traditions is associated with a seminal figure, Gottlob Frege, Immanuel Kant, and Thomas Aquinas, respectively. The questions addressed in this book are constitutional for the philosophy of being, considering the meaning of being, the relationship between thinking and being, and the methods for using thought to access being. On the one hand, the book honors diversity and pluralism, as it highlights how the three traditions may be clearly and distinctly differentiated regarding the philosophy of being. On the other hand, it honors a sense of solidarity and ecumenism, as it demonstrates how the methods and focal points of these traditions constitute, and continue to shape, the development of Western philosophy. This book contributes toward an essential overview of Western metaphysics and will be of particular interest to those working in the history of philosophy and in the philosophy of being. This is the first textbook to integrate American Counseling Association (ACA) and American Psychological Association (APA) ethical standards for programs spanning both counseling and

psychology. It provides a clear, comprehensive review of the codes of ethics of both organizations, distilling the essence of each to enable counselors and psychologists to understand and engage in ethical decision making. The text also clarifies legal requirements at state and federal levels, and facilitates critical thinking about the complex intersection of legal requirements and ethical codes in a way that is easily understandable. Focusing on key issues such as confidentiality, professional boundaries, professional and multicultural competence, social media, and situations with colleagues, the book is also unique in its inclusion of how ethical guidelines are influenced by self-care. Chapters engage readers with self-assessment questions, illustrative case vignettes, and discussion questions. A glossary of terms helps to clarify legal and ethical terminology, and additional resources direct readers to more in-depth research. The text is ideally suited to meet the needs of both CACREP and non-CACREP programs that train counselors who work in an interprofessional climate of mental health care. It is also useful for undergraduate programs in addiction and substance abuse services counseling. The availability of an Instructor's Manual and PowerPoints provides additional value.

As a basic medium of human interaction, the body is fundamental to socio-cultural communication systems, in particular the communication system of religion. This innovative and ground-breaking volume studies these systems and the role that the body plays in their organization through the perspective of the concept of body as a medium and by drawing on media and communication theory. This first complete English translation, including over 250 full-color

images, is a longitudinal cultural history of how art came to be institutionalized in the history of western representational practices.
