Learn All about Dinosaurs - Book 2 Of 2 Jan 10 2022 Learn All About - books for kids are designed around the research and findings of child psychologists and teachers. This series is targeted toward early readers between ages 3 to 8. This series engages young minds with short facts paired with vivid full-page images that will help to retain your child's attention as you guide their reading. This is an educational series; they are not storybooks. This book introduces your child to this amazing creature with facts such as "Pterosaurs were some of the most successful hunters during the time of the dinosaurs." and "Many types of dinosaurs would stay in family groups and care for their young together." and many more. The colorful, vivid and engaging photos will capture your child attention and imagination. This collection is specifically for guided reading which will help your child to retain more information with time and practice. Unlike many other Early Learning Children's books, Learn All About - books for kids does not introduce a story line. Instead, the series is focused on short, interesting facts that your child will remember and be able to use in conversation. Take a look inside of the book before you buy it using Amazon's "Looks inside" feature (the link is right above the book's cover image). If you purchase the 8.5"x11" paperback collection, we encourage you to allow your children to draw, write and scribble their thoughts in the ample space provided on each page; hand-marking is key for successful learning for children.

Dinosaurs Feb 23 2023 This reference work is the second supplement to *Dinosaurs: The Encyclopedia* (a 1998 American Library Association Outstanding Reference Book) and follows the intent and format of the encyclopedia and first supplement. This continuation of what is now the standard encyclopedia provides up-to-date concepts and evidence of dinosaur paleobiology and evolution. Various competing positions are well presented and exhaustively referenced. The content is based on the latest original research of paleontologists, especially in dinosaur systematics, and genera, and covers such topics as the constant changes in technology and research methods, the Mesozoic Era in general, new theoretical ideas, the dinosaur-bird debate, dinosaur extinctions, and nomen nudum and excluded genera. Supplemental volumes do not repeat information from earlier volumes, but build upon them: view all volumes on the series page.
