Authentic Japanese Gardens Feb 24 2020 This beautifully illustrated book provides an inspirational and practical introduction to the traditions of Japanese Zen gardens, using natural materials such as wood, bamboo, rocks and pebbles. Emphasizing the value of shape in trees and shrubs with the subtlety of color through the varied greens of foliage and moss, *Authentic Japanese Gardens* explains how western plants and materials can be used to achieve peaceful, contemplative gardens. There are instructions and tips for selecting plants and materials that are readily available, as well as plant lists and climate zone maps to aid western gardeners. As the wealth of stunning color photographs from around the world demonstrates, Japanese garden design is concerned with a reverence for nature and the overall effect is of tranquility. *Authentic Japanese Gardens* will help people to create much-needed oases of calm in their own outdoor spaces.

*The First Apartment Book* Jan 05 2021 In *The First Apartment Book*, Kyle shares brilliant design ideas and thirty simple DIY projects that show how anyone can infuse a first home with personality whether you're

renting, moving in with a roommate or significant other for the first time, or are a newly minted owner eager to put your stamp on your place. *The First Apartment Book* is both a tour of amazing photographs from ten real homes across the country and a hardworking resource of great ideas. Kyle explains how each of the featured apartments achieves the perfect balance between cool design and the homeowner's lifestyle, with a sprinkling of influences from the resident's city thrown in. Kyle scours flea markets for functional pieces with personality and incorporates Pollock-inspired art and touches of taxicab yellow to make a small studio in New York City function as four different yet coherent rooms. Graffiti-like dip-dye curtains and a skateboard table reflect a Seattle renter's hip sensibility. In Cleveland, Kyle creates a modern preppy space for a plaid-loving local using subdued colors and careful pattern mixing. A couple's salon-style hanging of rock posters in Nashville feels utterly unique, and Kyle's clever ideas for storing to store their musical instruments keep the duo sane. Short on time and long on style, the thirty DIY projects include no-sew pillows, yarn-wrapped picture frames, and a dresser update using a little glue and fabric. Full of bold, vibrant photos and hundreds of big ideas for small spaces, *The First Apartment Book* proves that no matter what your landlord, your floor plan, or your wallet says, there are no limits on how cool your first apartment can be.

When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

Conservation of Modern Architecture Mar 27 2020 The importance of protecting significant buildings from decay and destruction would seem to be undeniable. Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference, and in some cases hostility towards many important post-war buildings. These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished. This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time. Climate change in particular has forced change in the way in which we think about buildings, with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike.

**House Proud** Jul 31 2020 Experience the joy of décor and design, restoration and rebirth, color and comfort—all in the enchanting locale of Louisiana. A New Orleans-based interior designer, Valorie Hart expertly leads a private tour of the most fashionable homes in the state. Sara Essex Bradley's photographs document the personality of Louisiana's homes, from the formal Greek revival house to the warm Creole cottage, the pre-Civil war beauty to the kitschy '50s-style ranch, the grand Victorian to the modern urban loft. This is not simply a design inspiration book, but rather a thoughtful compilation of homeowners' personal stories of restoring and redesigning their dream houses—the stories of the “house-proud.” In addition to Debra Shriver's forward, Hart gives her creative expertise on re-purposing furniture, displaying art collections, creating extra rooms, and rethinking storage. Hart presents us with today's Louisiana homes: the feel of southern hospitality married with a look of contemporary chic.

**Work - Its Original Design** Aug 24 2022 The Fall had its impact on the workplace. The workplace was cursed. There would be sweat, labor, and toil to enjoy fruit. And this would go on throughout a person's life. As believers, we are redeemed people who are in covenant with God, although we live in a fallen world. So, it is true that we will face the evil that is in the world. However, we are here to live as the redeemed of the Lord – as New Covenant people in whose lives the power of the Cross is at work. So, each day as we go into our workplace, we must believe in the redeeming power of the Cross to affect our work, our workplace, and our work life. Because of the Cross, we can recover God's original design for the workplace. Watch our online Sunday Church service live stream every Sunday at 10:30am (Indian Time, GMT+5:30). *A John Heskett Reader* Jul 11 2021 A John Heskett Reader brings  
together a selection of the celebrated design historian John Heskett's key  
works, introduced and edited by Clive Dilnot of Parsons, the New School,  
USA. Heskett, who passed away in early 2014, was a pioneering British-  
born writer and lecturer. His research was foundational for the study of  
industrial design, and his research into the relationship between design,

policy and economic value is still a regular reference-point for academics  
and students alike. This anthology represents well the great range of his  
work, covering such varied topics as the growth of Japanese  
industrialism, modernism in the Third Reich, and 1980's corporate  
design management. Including both hard-to-access and previously  
unpublished material like *Crafts, Commerce and Industry* and *Economic  
Value of Design*, the book demonstrates Heskett's passionate interest in  
exploring the relationship of design and making with economic value  
across the entirety of human history. Featured texts include, *What is  
Design*, *Chinese Design: what can we learn from the past?*, *The  
'American System' and Mass Production*, *The Industrial Applications of  
Tubular Steel*, *Creative Destruction: the nature and consequences of  
change through design*, *Reflections on Design and Hong Kong*, besides  
many others.

*Designing Your Life* Jun 22 2022 #1 NEW YORK TIMES BEST SELLER •  
At last, a book that shows you how to build—design—a life you can thrive  
in, at any age or stage Designers create worlds and solve problems using  
design thinking. Look around your office or home—at the tablet or  
smartphone you may be holding or the chair you are sitting in.  
Everything in our lives was designed by someone. And every design  
starts with a problem that a designer or team of designers seeks to solve.  
In this book, Bill Burnett and Dave Evans show us how design thinking  
can help us create a life that is both meaningful and fulfilling, regardless  
of who or where we are, what we do or have done for a living, or how  
young or old we are. The same design thinking responsible for amazing  
technology, products, and spaces can be used to design and build your  
career and your life, a life of fulfillment and joy, constantly creative and  
productive, one that always holds the possibility of surprise.

**Design First** Dec 16 2021 Well-grounded in the history and theory of Anglo-American urbanism, this illustrated textbook sets out objectives, policies and design principles for planning new communities and redeveloping existing urban neighborhoods. Drawing from their extensive experience, the authors explain how better plans (and consequently better places) can be created by applying the three-dimensional principles of urban design and physical place-making to

planning problems. Design First uses case studies from the authors' own professional projects to demonstrate how theory can be turned into effective practice, using concepts of traditional urban form to resolve contemporary planning and design issues in American communities. The book is aimed at architects, planners, developers, planning commissioners, elected officials and citizens -- and, importantly, students of architecture and planning -- with the objective of reintegrating three-dimensional design firmly back into planning practice.
